MILITARY SPECIFICATION

MAINTENANCE KIT, ELECTRICAL CONNECTORS

GENERAL SPECIFICATION FOR

This amendment forms a part of MIL-M-83521A, dated 24 July 1987, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 2

Following 3.1, add:

"3.1.1 First article. Maintenance kits furnished under this specification shall be products which have been tested and have passed the first article inspection specified (see 4.3)."

PAGE 3

4.1 and 4.1.1, delete and substitute.

"4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements (examinations and tests) as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in this specification where such inspections are deemed necessary to ensure supplies and services conform to prescribed requirements.

"4.1.1 Responsibility for compliance. All items shall meet all requirements of sections 3 and 5. The inspection set forth in this specification shall become a part of the contractor's overall inspection system or quality program. The absence of any inspection requirements in the specification shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling inspection, as part of manufacturing operations, is an acceptable practice to ascertain conformance to requirements, however, this does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to accept defective material."

4.2, delete and substitute:

"4.2 Classification of inspection. The inspection of the kit shall be classified as follows

a. First article inspection (see 4.3).

b. Quality conformance inspection (see 4.5)."

4.3, delete and substitute:

"4.3 First article inspection. First article inspection shall consist of certification supported by verifying data that the material and components, as specified herein and in specification sheets (see 3.1), used in fabricating the kits, are in accordance with the applicable referenced specifications or requirements prior to such fabrications."
