COMMERCIAL ITEM DESCRIPTION

MITT, PAINT
(WITH TWO POLYETHYLENE LINERS)

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification KK-M-330.

This description covers two types of thumb-style paint mitts furnished with two polyethylene liners.

Type I - Lambskin
Type II - Polyester

Salient characteristics:

The type I mitt shall be made from chrome-tanned shearling lambskin so constructed that the wool, 3/4 ± 1 inch long, remains on the outside of the mitt. The type II mitt shall be made from knotted, crimped polyester on a 100 percent polyester backing. The pile height shall be 3/4 ± 1/4 inch long.

The mitt for both types shall be designed with rounded corners, a thumb sheath, and have an elastic wristlet made of a true 1 by 1 rib-knit seamless cotton tubing. The whole mitt shall be pieced and sewn with nylon thread, with not more than three pieces of skin on either side. All seams shall be backstitched. Two polyethylene liners, of approximately the same design as the mitt and sized to fit inside the mitt, shall be packaged with each mitt.

The mitt shall be a minimum of 9-1/2 inches in length, 3-1/4 ± 1/4 inches in width at its widest point, with the thumb 2-1/2 ± 1/4 inches in width.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. Preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Notes: When this commercial item description is used for procurement the commercial item certification clause must appear in the solicitation.

PREPARING ACTIVITY:

GSA - FSS
