COMMERCIAL ITEM DESCRIPTION

TRAY, ROLLER
(FOR USE WITH PAINT ROLLERS)

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification H-R-550.

This description covers a heavy-duty tray for the purpose of loading paint onto paint rollers.

Salient characteristics:

The trays shall be of two types:

Type I - Metal
Type II - Polyproylene

The metal paint roller trays (Type I) shall be made of corrosion resistant metal or metal made corrosion resistant by plating. The metal shall be 30-gage (0.012 inch) or thicker. The polypropylene tray shall have a minimum thickness of 0.060 inch and a minimum weight of 11 ounces. Both type I and type II trays shall have a full capacity of not less than 1-gallon and a working capacity of not less than 1-quart. The tray shall be tappered in depth, and shall be of ribbed, studded or dimpled bottom construction, suitable for use with 9-inch rollers. The tray shall have a leg construction suitable for use on a ladder or plank. When filled to working capacity and hooked over a ladder or plank, the tray shall not buckle. The tray shall not discolor, wrinkle, blister, or otherwise deteriorate or be deleteriously affected when submerged for one hour in a solvent mixture, by volume, of

Normal butyl acetate	15 ± 1 percent
Normal butyl alcohol	15 ± 1 percent
Methyl ethyl ketone	10 ± 1 percent
Toluene	Remainder

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. Preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Note: When this commercial item description is used for procurement the commercial item certification clause must appear in the solicitation.
