COMMERCIAL ITEM DESCRIPTION

DATING STAMP
(REMOVABLE TYPE)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification ZZ-R-1414.

Salient characteristics:

Each stamp shall have a suitable handle, a base with a die consisting of a fixed legend and a mortise for removable date types, a set of removable type, a tweezer for handling the type, and a box with compartments for storing the type.

The removable type shall consist of day, month, and year type. The day type shall be separate type for the numerals "1" through "31." The month type shall be the capitalized first three letters of each month. The year type shall be nine consecutive, four numeral year dates, beginning with the year of the contract or order. The type body shall be at least 5/16 inch thick, with characters raised in relief at least 1/32 inch. The printed height of the characters shall be 9/64 inch (commercial size 1-1/2) or as stated in the procurement documents.

The fixed legend characters shall be raised in relief at least 1/32 inch from a rubber body at least 5/16 inch thick. The design, contents, and character height of the legend shall be as stated in the procurement documents.

The base and handle shall have a smooth finish to prevent injury to the user. When specified in the procurement documents, a replica of the legend shall be affixed to the front of the stamp base. The front of tne stamp shall be in any case, readily identified. Metal components shall be coated or treated to prevent corrosion.

Each stamp shall produce clear, distinct, sharp, single impressions of equal intensity, with no closing of characters. The synthetic and natural rubbers used in this stamp shall be of sufficient hardness and durability to ensure usability over the entire 9-year lifetime of the stamp.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The stamps shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.
