COMMERCIAL ITEM DESCRIPTION

BRUSH, SCRUB, BASEBOARD

The General Services Administration has authorized the use of this commercial item description in lieu of Interim Federal Specification H-B-00515.

This commercial item description covers baseboard scrub brushes, with synthetic filaments and a separate handle.

Salient characteristics.

The block shall be triangular in shape with chamfered corners, side edges, and beveled ends.

The block shall have two symmetrical holes for the handle, one on each side equidistant from the ends of the block. The holes shall be threaded to receive an acme threaded handle at an angle of 45 degrees, plus or minus 10 degrees, from horizontal.

The holes for tufts shall be so placed that the tufts form a 90 degree angle at the apex of the block. The exposed ends of the filaments for the brushes shall be trimmed to taper from 2 inches at the apex of the block down to 1-1/2 inches at the corner of the block.

The handle shall be acme threaded to fit the block in accordance with commercial practice.

Dimensions.

Block:

Length over-all, minimum, inches	5-1/2
Width over-all, minimum, inches	2-7/8

Holes for fiber or filament:

Number of holes, minimum	100
Number of rows, minimum	16
Number of holes across each row, minimum, except where necessary to form the apex.	6

Fiber or filament:

Length clear of block, minimum, inches	1-1/2
Number of fibers or filaments per tuft, minimum	38

Handle:

Length, overall, minimum, inches	54
Diameter, minimum, inch	15/16

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. Each brush shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.
