COMMERCIAL ITEM DESCRIPTION

CLAMP, SCREW, QUICK-ADJUSTING (THREADED HEAD)

The General Services Administration has authorized the use of this commercial item description in lieu of Type III, Class C, Federal Specification GGG-C-406.

This description establishes requirements for a threaded head quick-adjusting screw clamp used for clamping and holding work in a fixed position. Assigned NSN 5120-00-329-3298.

Salient characteristics:

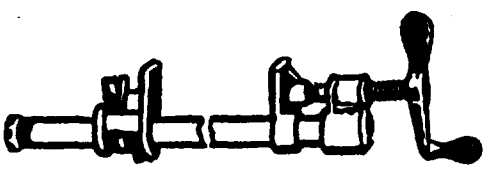

Stationary head:

1. Malleable iron; furnished with adjusting jaw face - 1-3/4 x 1-3/4 inches ± 1/8 inch.
2. Driven by a crank through a screw.
3. Head shall screw on 3/4-inch threaded pipe. The head shall contain two holes which are substantially parallel to each other. One hole shall have a 5/8-inch, right-hand, hole shall be counterbored and threaded to receive a 3/4-inch iron pipe. The counterbore shall have a minimum diameter of 1.060 inches for approximately one-half the depth of the hole and the remainder of the hole shall have 3/4-14 NPT threads.
4. Screw, steel, 5/8 inch diameter minimum, right-hand, square or Acme threads. All surfaces of the clamps shall have a smooth finish with all edges rounded or beveled and shall be thoroughly cleaned and free of all foreign matter, fins, scale, flux, or any other imperfection. The screw shall provide a travel of not less than 1-1/2 inches to the adjustable jaw.

Adjustable head:

1. Malleable iron; fits on 3/4-inch pipe.
2. 1-3/4 x 1-3/4 inch face, ± 1/8 inch.
3. Slides on pipe with mechanical locking device.
4. A hardened steel plate or other device shall be provided to prevent excessive wear where the end of the screw bears on the adjustable jaw.

Illustration. The clamp shall be similar to the illustration shown below.

DISTRIBUTION STATEMENT A. Approved for Public Release; Distribution is Unlimited.

FSC 5120

Check the source to verify that this is the current version before use.

Identification marking. Each clamp shall be etched or stamped in a permanent and legible manner with the manufacturer's name or identifying symbol, part number and country of origin.

Workmanship. The clamps shall be free of any defects that can adversely affect their operation, serviceability, or life expectancy.

QUALITY ASSURANCE PROVISIONS

Examination of the end item for defects in dimensions, finish, markings, and workmanship. Sampling shall be in accordance with MIL-STD-105 at inspection level II with an acceptable quality level (AQL) of 2.5.

Sampling for tests. Sampling for tests shall be in accordance with MIL-STD-105 at inspection level S-3 with an Acceptable Quality Level (AQL) of 4.0.

Tests:

Proof load test. Shall be conducted on a tension machine or similar device of known accuracy. Clamp shall be subjected to the applicable specified test load. The test shall be conducted with the clamp in the full open or minimum capacity opening as applicable. The test load shall be applied gradually, to simulate actual usage, until the specified minimum load is obtained. This load should be maintained for a period of not less than 5 minutes. Upon completion of this test, the clamp shall be examined and any evidence of deformed or damaged components shall be sufficient cause for classifying that clamp as a reject. The test load shall be applied to the center line of the screw.

Regulatory requirement. In accordance with the section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing suppliers' employees to undue hazards from the recovered materials.

Preservation, packaging, packing, labeling, and marking: The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Notes:

The issue of referenced documents in effect on the date of invitation for bid or request for proposals shall be used to determine compliance with the stated requirements. Sources for obtaining referenced documents may be determined by contacting the Contracting Officer.
