INCH-POUND

MIL-F-48275(AR)
AMENDMENT 1
29 October 1996

MILITARY SPECIFICATION

FUZE, PIBD, M550; TEST VEHICLE FOR
METAL PARTS AND LOADING, ASSEMBLING AND PACKING

This amendment forms a part of MIL-F-48275(AR), dated 18 March 1974, and is approved for use by the US Army Research, Development and Engineering Center, and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 7

4.5.1, Delete in its entirety and substitute:

"4.5.1 Specific gravity of inert material. The specific gravity of the inert material shall be determined as follows

Weigh the empty cup and skirt assembly in grams and record as We. Fill the empty assembly with water at 75 degrees ± 2 degrees F., weigh in grams and record the weight as Ww. Determine the volume by subtracting We from We. Load the assembly with inert material. Surface of inert material to meet depth requirement, or liner assembly cavity may be formed or drilled. Weigh the assembly in grams and record the weight as W1. Fill assembly with water at 75 degrees ± 2 degrees F., weigh in grams and record the weight as Wb. Calculate the specific gravity as follows:

$$\text{Specific Gravity} = \frac{W1 - We}{(Ww - We) - (Wb - W1)}.$$

Alternate method for specific gravity determination.

Prior to assembly, weigh empty body assembly with liner assembly and retainer in air (grams). Record the weight as "A".

Prior to assembly, weigh the same empty body assembly with liner assembly and retainer submerged in water (grams). Record the weight as "B".

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Dry the components and load with inert material using normal production methods.

Weigh the loaded assembly in air (grams). Record the weight as “C”.

Weigh the loaded assembly submerged in water (grams). Record the weight as “D”.

Calculate the specific gravity of charge as follows:

$$\text{Specific Gravity} - \frac{C-A}{(C-A) - (D-B)}.$$

The margins of this amendment are marked with an asterisk or vertical lines to indicate where changes (additions, modifications, corrections, deletions) from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
