MILITARY SPECIFICATION SHEET

SLEEVES, FASTENER, GROOVED, RELIABILITY AND MAINTAINABILITY (REPAIR AND MAINTENANCE) REQUIREMENTS FOR

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The complete requirements for procuring the sleeves described herein shall consist of this document and the latest issue of MIL-S-85069.

1. The fastener sleeves shall replace oversize shank fasteners for repair and maintenance. The sleeves shall be used with standard diameter straight shank fasteners. They shall be used under the same restrictions as oversize fasteners and in compliance with the specific user's repair procedures and restrictions.

2. There shall be no restrictions on the number of fasteners installed with sleeves when the edge distance from the center of the hole is 2D (diameter) and greater.

3. The fastener or attaching element (nut or collar) shall contain a counterbore to accept the protrusion of the sleeve; or a washer shall be used; or the sleeve shall be flush on the backside of the stack up.

4. The fastener sleeves shall not be used with tapered shank fasteners or blind fasteners.

5. Interference (hole to sleeve) shall be not greater than .003" where the material thickness is less than 1/2". Interference shall be not greater than .0015" where material thickness is greater than 1/2".

6. Appropriate engineering approval shall be required in the following applications:

   a. In fluid containers having no self-sealing feature (e.g., fuel, oil or water tanks).

   b. Fatigue and fracture critical locations.

   c. Where the edge distance from the center of the hole is less than 1-1/2D.
