INTERIM COMMERCIAL ITEM DESCRIPTION

BANDAGE, GAUZE, Two-Ply, 4 inch by 5 yards

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-ATT, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

This Interim Commercial Item Description covers a sterile, roller-type, elastic gauze bandage, suitable for medical use.

Salient Characteristics:

The bandage shall be a sterile, roller-type, elastic gauze bandage, two-ply, 4 inches (+/- 1/8 inch) wide and 5 yards (minimum of 179 inches) long in the stretched condition, suitable for medical use.

The gauze shall meet the requirements of Absorbent Gauze, USP, except for thread count and weight and except that water extract shall not exceed 28 mg and except that the gauze shall be all cotton. The gauze shall have undergone treatment causing it to shrink and have an excess crimp in the warp direction or in the warp and fill directions. The finished gauze shall have a minimum of 12 yarns per inch in the fill with the gauze in the relaxed condition. The weight of the finished gauze in the relaxed condition shall range from 20 to 25 grams per square meter.

The bandage shall be made by folding the treated gauze to two-ply by turning the lateral edges inwardly toward each other to an abutting position at approximately the center line of the bandage. The folded gauze shall be rolled with the folded edges to the outside of the roll. The edges of the rolled bandage shall be uniformly aligned.

FSC 6510

DISTRIBUTION STATEMENT A. Approved for public release, distribution is unlimited.

Check the source to verify that this is the current version before use.

The finished bandage shall contain no rubber adhesive or sizing materials; shall be of one continuous piece, shall not be cut on the bias, and shall be free of cuts, loose threads, and ravelings.

Testing and examination shall be conducted to determine compliance with all specification requirements. Test methods shall be suitable, accurate, and reproducible.

Workmanship. The bandage shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). Each bandage shall be individually packaged to maintain sterility of contents unless package is damaged or opened. One package containing 72 individually packaged bandages, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.
