INTERIM COMMERCIAL ITEM DESCRIPTION

SPONGE, SURGICAL, NONWOVEN, RAYON, PATTIE, RADIOPAQUE

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-ATT, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

This Interim Commercial Item Description covers a Nonwoven, Rayon, Radiopaque, Surgical Sponge Pattie, suitable for use with forceps as a miniature sponge in neurological surgical procedures.

Salient Characteristics:

The sponge shall be a sterile, nonwoven sponge, x-ray detectable, suitable for use with forceps as a miniature sponge in neurological surgical procedures.

The sponge shall be fabricated of random oriented rayon fiber fabric, double-needled and lightly bonded and shall retain its shape when wet.

The sponge shall resist shredding, stretching or shedding, wet or dry. Radiopaque stitching or bonding shall run the full length of the sponge except for the 1/4 by 1/4 inch sponge, for which the radiopaque stitching or bonding shall cover the entire surface of the sponge.

The sponge shall be single strung. The sponge string shall be at least 6 inches long and shall be dyed green, blue or black for visibility and easy retrival. The dyes shall meet the requirements of the Federal Food, Drug and Cosmetic Act for dyes.

The sponge shall be capable of absorbing more than five times its own weight of water in less than a second.

FSC 6510

DISTRIBUTION STATEMENT A. Approved for public release, distribution is unlimited.

Sponges shall have the following dimensions for the applicable sizes given below in table I.

TABLE I. DIMENSION

ITEM DIMENSIONS (IN INCHES - NOMINALS)	SIZE
1/4 by 1/4 inch	1
1/2 by 1-1/2 inches	2
1/2 by 2 inches	3
1 by 1 inch	4
1 by 3 inches	5
3 by 3 inches	6

Ten sponges of one size only, shall be precounted and mounted on a count card.

Testing and examination shall be conducted to determine compliance with all specification requirements. Test methods shall be suitable, accurate and reproducible.

Workmanship. The sponge shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). Ten sponges of one size only shall be mounted on a count card and packaged in a peel-open type container capable of maintaining sterility of contents unless container is damaged or opened. One package containing 20 peel-open type containers (200 sponges) of one size only, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements
