FEDERAL SPECIFICATION

CASES, BRIEF, LEATHER

This amendment which forms a part of Federal Specification KK-C-121c, dated 23 January 1952, was approved by the Commissioner, Federal Supply Service, General Services Administration for the use of all Federal agencies.

Page 1, section 2 heading, and paragraph 2.1: Delete in entirety and substitute:

2. APPLICABLE SPECIFICATIONS AND STANDARD

2.1 The following specifications and standard, of the issues in effect on date of invitation for bids, form a part of this specification:

Federal Specifications:

V–T–291—Thread; Linen.

KK–L–154—Leather; Bag and Case.

KK–L–311—Leather; Methods of Sampling and Testing.

QQ–B–611—Brass, Commercial; Bars, Plates, Rods, Shapes, Sheets, and Strips.

CCC–T–191—Textile Test Methods.

DDD–S–751—Stitches; Seams; and Stitching.

Military Specification:

MIL–T–3530—Treatment, Midew-Resistant, For Thread and Twine.

Military Standard:

MIL–STD–130—Identification Marking of U. S. Military Property.

(Activities outside the Federal Government may obtain copies of Federal Specifications and Standards as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

(Single copies of this specification and other product specifications required by activities outside the Federal Government for bidding purposes are available without charge at the General Services Administration Regional Offices in Boston, New York, Atlanta, Chicago, Kansas City, Mo., Dallas, Denver, San Francisco, Los Angeles, Seattle, and Washington, D. C.

(Federal Government activities may obtain copies of Federal Specifications and Standards and the Index of Federal Specifications and Standards from established distribution points in their agencies.

(Copies of the Military specification and standard referenced above, required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

sile strength is less than 75 percent of the average of at least 10 specimens not leached or subjected to mildew as described in above method 4751 the treatment shall be disapproved.

Page 6, paragraph 3.9.4: Delete third sentence and substitute: "The prongs shall be at least 0.025 inch thick with a minus tolerance of 0.0015 inch, 0.20 inch wide, and ⅜ inch long."

Page 6, paragraph 3.9.7.3: Delete last sentence and substitute: "The length of the straps exclusive of the buckles shall be not less than 32 inches for a two-pocket case, 34 inches for a three-pocket case, and 36 inches for a four-pocket case."

Page 17, paragraph 3.16: Delete and substitute:

3.16 Identification of product.—The cases shall be permanently and legibly marked for identification on the underside of the closing flap or inside cover in letters at least 3/16 inch high in accordance with the requirements of Military Standard MIL–STD–130.

Page 18, section 4: Delete and substitute:

4. SAMPLING, INSPECTION, AND TEST PROCEDURES

4.1 Sampling.

4.1.1 *Materials.*—When specified in the invitation for bids, the contractor shall furnish a sample of not less than 310 yards of the thread used in the manufacture of the cases or bags.

4.1.2 *Cases and bags.*

4.1.2.1 *Formation of lots.*—Lots of each type and size shall be formed as described in 3.1 of section 6 of Federal Specification KK–L–311.

4.1.2.2 *Sampling for inspection.* — Samples for inspection shall be taken as described in 3.2, section 6, of Federal Specification KK–L–311.

4.1.2.3 *Sampling for physical and chemical tests.*—Samples for test shall be taken as described in 3.3.1 and 3.3.3 of section 6 of Federal Specification KK–L–311.

4.2 Inspection. — Each unit in the sample shall be inspected for type, color, finish, construction, type of stitching, type of locks, and dimensions of cases and bags.

4.2.1 *Thickness.* — The thickness of the leather shall be determined as described in 4.2.1 and applicable parts of section 5 of method 1011 of Federal Specification KK–L–311, except that paragraph 5.1 shall not apply to this specification.

4.2.1.1 *Number of units to be measured for dimensions.*—If the sample contains 20 or less units, all the units shall be measured. If the sample contains 20 or more units, at least 20 units or at least 40 percent of the units in the sample for inspection, whichever is larger, shall be measured.

4.3 Test procedures.

4.3.1 *Specimens for physical tests.* — Specimens for physical tests shall be taken from the test unit as required in the applicable method of test.

4.3.2 *Specimens for chemical tests.* — Specimens for chemical tests shall be taken from the composite sample prepared as described in method 6002 of Federal Specification KK–L–311 as required in the applicable method of test.

4.3.3 *Tests.* — Physical and chemical tests shall be made in accordance with the applicable methods described in the following Federal Specifications:

Tests	Federal Specification	Method No.
Colorfastness to rubbing..	KK-L-311	3011
Paranitrophenol	KK-L-311	6711
Thread (mildew resistance)	CCC-T-191	4750
Thread (properties)	V-T-291	——
Case leather	KK-L-154	——
Brass	QQ-B-611	——

4.4 Acceptance of lot. — A lot of leather shall be considered as meeting the requirements of this specification if the conditions described in paragraph 5 of section 6 of Federal Specification KK–L–311 are fulfilled.
