ABSTRACT

This information presents the award costs and descriptive data of facility types sorted by category codes. The award costs have been adjusted to conform to a standardization of size, location, and time.

FOREWORD

This publication presents the Naval Facilities Engineering Command (NAVFACENGCOM) criteria and procedures related to the preparation and review of the Activity's Facility Study and the Engineering Field Division's (EFD) Cost Certification estimates for the Military Construction Program, including O&M projects. This publication is intended to be a cost estimate preparation and review guide, and should not be used exclusive of full consideration of scope, additional functional features and supporting facilities.

This publication supersedes DM-10, "Cost Engineering Criteria and Cost Data" dated May 1984. It is presented in two volumes, MIL-HDBK-1010/1 and 1010/2.

MIL-HDBK-1010/1 provides guidance, procedure, and examples. The guidance cost given are for two consecutive fiscal years based on an area cost factor of 1.00. MIL-HDBK-1010/2 provides data that has been entered in the NAVFACENGCOM historical cost file. The source of information is the EFD award data. The adjusted unit costs have been escalated to a common date for one fiscal year, and have been adjusted for size and area cost factors. The job descriptions are for use in modifying award cost to suit the scope of a planned project. The entries are self explanatory except the "pricing factor". The cost engineer has selected a position on a scale of 1 to 5 (1 for lowest expected influence) for three factors: competitive climate, job conditions, and complexity. The "pricing factor" is the sum of the three selections, and is useful in adjusting to the expected variation of those factors.

Design cannot remain static any more than can the functions it serves or the technologies it uses. Accordingly, recommendations for improvement are encouraged and should be furnished to Commander, Atlantic Division, Naval Facilities Engineering Command, Code 407, Norfolk, VA 23311-6287; telephone (804) 444-9970.

THIS HANDBOOK SHALL NOT BE USED AS A REFERENCE DOCUMENT FOR PROCUREMENT OF FACILITIES CONSTRUCTION. IT IS TO BE USED IN THE PURCHASE OF FACILITIES ENGINEERING STUDIES AND DESIGN (FINAL PLANS, SPECIFICATIONS, AND COST ESTIMATES). DO NOT REFERENCE IT IN MILITARY OR FEDERAL SPECIFICATIONS OR OTHER PROCUREMENT DOCUMENTS.
