OO-B-670
AMENDMENT—2
November 23, 1966

SUPERSEDING
Int. Amendment—1(Army-GL)
December 8, 1965

FEDERAL SPECIFICATION

BREAD-SLICING MACHINE, HAND AND ELECTRIC OPERATED, SINGLE ROTATING KNIFE AND ELECTRIC-OPERATED MULTIPLE KNIFE

This amendment, which forms a part of Federal Specification OO-B-670, dated August 26, 1963, was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

PAGE 1

Paragraph 2.1, under *"Federal Specifications:"* add:

"MMM-A-260—Adhesive, Water-Resistant, (For Sealing Waterproofed Paper)."

PAGE 2

Under *"Military Specifications:"* delete:

"MIL-A-140—Adhesive, Water-Resistant, Water Proof Barrier-Material.
MIL-B-11748—Interference Reduction for Electrical and Electronic Equipment."

Substitute:

"MIL-I-16910—Interference Measurement, Radio, Methods and Limit; 14 Kilocycles to 1,000 Megacycles.
MIL-E-55301—Electromagnetic Compatibility."

PAGE 4

Paragraph 3.5.2, between "302" and "of" insert "or 304".

Paragraph 3.6, seventh sentence: delete "1/2" and substitute "1/4".

PAGE 5

Paragraph 3.6.1, end of paragraph: delete the period and add "except electromagnetic compatibility shall be as specified in 3.6.19."

Paragraph 3.6.5, last sentence: delete and substitute: "One-eighth inch back from the cutting edge shall have a Rockwell hardness number of not less than C54, when tested as specified in 4.4.2."

Paragraph 3.6.5.2, first sentence: between "from" and "carbon", insert "aluminum,"; end of first sentence: delete "period", and add "and shall have the knives set to slice 1/2-inch thick or 7/16-inch thick slices, as specified (see 6.2)." Second sentence: delete "a mechanical" and substitute "an automatic".

PAGE 6

Paragraph 3.6.14, first sentence: delete "28" and substitute "25-1/2"; also in last sentence delete "8" and substitute "6-3/16".

PAGE 7

Page 3.6.19, delete and substitute:

3.6.19 *Electromagnetic compatibility.* Electromagnetic compatibility shall be as specified below (see 6.2).

3.6.19.1 *Army requirements.* Unless otherwise specified (see 6.2), the types I and II breadslicing machine procured under this specification shall be designed and equipped for conformance to the administrative requirements of MIL-E-55301 (see 4.4.4).

3.6.19.2 *Navy requirements.* The types I and II breadslicing machines procured for the Navy under this specification shall con-

form to the requirements of MIL-I-16910 (see 4.4.5).

PAGE 8

Paragraph 4.2, delete "and 4.4.4" and substitute, "4.4.4, and 4.4.5".

Paragraph 4.3.1, delete and substitute:

4.3.1 *Component and material inspection.* In accordance with 4.1, components and materials shall be inspected and tested in accordance with all the requirements of referenced specifications, drawings, and standards unless otherwise excluded, amended, modified, or qualified in this specification, or applicable purchase document.

Paragraph 4.3.2, delete "L3" and substitute "S-2".

PAGE 10

Paragraph 4.3.3.3, insert after 1st sentence: "Any nonconformance shall be cause for rejection of the unit. When no preproduction sample is required, one production unit from the initial lot shall be tested as specified in 4.4.1, 4.4.4, and 4.4.5. Any nonconformance shall be cause for rejection of the lot."

Paragraphs 4.3.3.2 and 4.3.4, delete "L4" and substitute "S-2".

Paragraph 4.4.4, delete and substitute:

4.4.4 *Electromagnetic compatibility tests.* The preproduction model or one production unit from the initial lot, equipped for the reduction of radio interference in accordance with 3.6.19.1, shall be tested as described in MIL-E-55301 by the supplier or his private testing organization. The supplier shall furnish the contracting officer, for approval, the report(s) required in MIL-E-55301. The report(s) will include all the required information and shall be submitted within the time intervals specified in MIL-E-55301. Upon approval of the report(s) by the contracting officer, and provided all other requirements of the specification are met, the preproduction model or the initial unit of production shall be used as a model for all production units. If the supplier can certify that the equipment utilizes induction squirrel-cage type motors, and the switching transients can be exempted as short duration interference (see MIL-E-55301), the contracting officer may accept the units without tests or a report.

4.4.5 *Radio interference suppression test for Navy.* Navy requirements (see 3.6.19.2), for radio-interference suppression shall be conducted in accordance with MIL-I-16910 on the equipment covered by this specification. All testing equipment, instruments, and personnel for making the tests, the test location (reasonable free from radiated and conducted interference), and other necesary facilities shall be furnished by the supplier. Test for Navy equipment will not be required if equipment is identical electrically to equipment that has previously met the requirements of MIL-I-16910.

PAGE 11

Paragraph 5.2.1.2, tenth line: delete, "as specified in 5.2.1.2.1" and substitute "in accordance with the applicable container specification".

PAGE 12

Paragraph 5.2.1.2, fourteenth line: delete "MIL-A-140" and substitute "MMM-A-260".

Paragraph 5.2.1.2.1, delete.

Paragraph 5.2.2.1, delete last sentence and substitute "Closure shall be in accordance with method II of the appendix of PPP-B-636."

PAGE 13

Paragraph 6.2, add:

"(*i*) Whether radio-interference reduction is for Army or Navy (see 3.6.19).

(*j*) Whether Army radio-interference reduction is other than "administrative support" (see 3.19.1).

(*k*) Whether knives are set for 1/2-inch

thick or 7/16-inch thick slices (see 3.6.5.2)."

Paragraph 6.4, Delete and substitute:

6.4 Electromagnetic compatibility tests. The contracting officer should submit a copy of the report(s) required in 4.4.4 to the Commanding General, U.S. Army Electronics Command, ATTN: AMSEL-RD-GF, Fort Monmouth, New Jersey, for approval.

Delete "Notice" paragraph.
