INTERIM AMENDMENT

TO

FEDERAL SPECIFICATION

CLEANING COMPOUND, HIGH PRESSURE (STEAM) CLEANER

This Interim Amendment was developed by the Standardization Division, Federal Supply Service, General Services Administration, Washington, DC 20406, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of this Interim Amendment as a valid exception to Federal Specification P-C-437A, dated March 11, 1970.

PAGE 2

Paragraph 2.1: Add the following:

Laws and Regulations:

21 CFR 191 - Federal Hazardous Substances Act.

(The Code of Federal Regulations (CFR) and the Federal Register (FR) are for sale on a subscription basis by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. When indicated, reprints of certain regulations may be obtained from the Federal agency responsible for issuance thereof.)

Paragraph 2.2: Add the following:

The Soap and Detergent Association:

Test Procedure and Standards - ABS and LAS Biodegradability. Scientific and Technical Report No. 3.

The Status of the Biodegradability Testing of Nonionic Surfactants. Scientific and Technical Report No. 6.

(Application for copies should be addressed to The Soap and Detergent Association, 475 Park Avenue South, New York, NY 10016.)

PAGE 3

Paragraph 3.2.3: Delete in its entirety and substitute the following:

3.2.3 Synthetic detergents (biodegradability). The synthetic detergent in the compound shall be 90 percent (minimum) biodegradable when tested as specified in 4.4.16.

PAGE 7

After paragraph 4.4.3, add the following:

4.4.4 Performance tests. Performance tests shall consist of:

PAGE 12

Add new paragraphs 4.4.16, 4.4.16.1, and 4.4.16.2, as follows:

4.4.16 Biodegradability of the synthetic detergent. The supplier shall submit a certificate of compliance with the requirements for biodegradability. The certificate shall be submitted with the qualification sample, and be accompanied by actual test data (field or laboratory), including the test procedure used in making the determination.

4.4.16.1 Anionic synthetic detergents. When the detergent is an alkyl benzene sulfonate (ABS) or a linear alkylate sulfonate (LAS), the biodegradability shall be determined in accordance with the Test Procedure and Standards-ABS and LAS, Scientific and Technial Report No. 3 of The Soap and Detergent Association (see 2.2).

4.4.16.2 Nonionic and other synthetic detergents. Until a standard test method for determining the biodegrability of a nonionic detergent is agreed upon by industry, and is acceptable to the Government, the supplier shall determine the biodegradability in accordance with one of the current methods of The Soap and Detergent Association (see 2.2).
