P-P-105B
INT. AMENDMENT-4(GSA-FSS)
November 25, 1968
SUPERSEDING
Int. Amendment-3
April 18, 1968

INTERIM AMENDMENT
TO
FEDERAL SPECIFICATION

PAPER, ABRASIVE (FLINT)

This interim amendment was developed by the General Services Administration, Federal Supply Service, Washington, D. C. 20406, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized Federal Agencies to use this interim amendment as a valid exception to Federal Specification P-P-105B, dated September 10, 1964.

PAGE 1

Paragraph 1.2.1: Classes and grit sizes. Under Class 1, Grit size, delete "7/0 through 2/0" and substitute the following respectively:

"Grit size - 320, 280, 240, 220, 180, 150"

PAGE 2

Table I: Weight of paper backing, first line under Grit sizes column: Change "7/0 through 2/0" to read "320 through 150".

Paragraph 2.2: Under commercial Standard, delete "CS217", and substitute "PS8-", retain title.

Paragraph 3.1.1.2: Delete reference to "CS217", and substitute "PS8".

Table II – Tensile breaking strengths; first line, under Grit size column: Change "7/0 through "2/0" to read "320 through 150".

PAGE 3

Paragraph 3.4.2, delete in its entirety and substitute the following:

3.4.2 Roll. Class 3 flint paper shall be furnished in rolls with a standard length of 50 yards with a tolerance of minus "0" plus 12 inches and in the widths as specified (see 6.2)

Paragraph 3.5, delete in its entirety and substitute the following:

3.5 Indentification Marking. Each sheet of Class 1 abrasive paper shall be marked in accordance with sub-requirements (b). Each sheet of Class 2 abrasive paper shall be marked in accordance with sub-requirements (a) and (b). Rolls of Class 3 abrasive paper 6 inches and wider shall be marked at least once every yard. All markings shall be legible and permanent.

(a) Manufacturer's name or trademark of such character that the source of manufacture may be readily determined.

(b) Grit size.

PAGE 4

Paragraph 4.4.1.1 Grading for gram size: Delete reference to "CS217" and substitute "PS8".

Paragraph 4.4.1.2 Certification of grading: Delete reference to "CS217 and substitute "PS8".

PAGE 5

Table IV-Comparative grit sizes. Change the heading of first column to read: "Silicon carbide, aluminum oxide, and flint grit (class 1) sizes.

Delete "Class 1" from second column.

Add new paragraph:

6.8 Cross reference for grit sizes. Product Standard PS8, Grading of Abrasive Grain on Coated Abrasive Products uses the same classification for flint grit, silicon carbide, and aluminum oxide abrasives. Table IV shows the comparite grit sizes. Commercial producers have also adopted this classification.
