FEDERAL SPECIFICATION

LACES, FOOTWEAR, SPUN NYLON

This Amendment which forms a part of Federal Specification V-L-61c dated October 20, 1959, was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

Page 2, paragraphs 3.3.1.1 and 3.3.2. Delete and substitute new paragraph 3.3.2 as follows:

3.3.2 *Yarn.*—The nylon yarn for braiding the laces shall be a 2-ply yarn spun from nylon staple or a bulk-type filament nylon yarn.

Page 3, paragraph 4.1: Delete and substitute new paragraph 4.1 as follows:

4.1 Contractor's inspection responsibility.—The supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own or any other inspection facilities and services acceptable to the Government. Inspection records of the examination and tests shall be kept complete and available to the Government as specified in the contract or order. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.3.4 *Examination of preparation for delivery requirements.*—An examination shall be made to determine that packaging, packing, and marking requirements of Section 5 of this specification are complied with. Defects shall be scored in accordance with the list below. The sample unit shall be one shipping container fully prepared for delivery, with the exception that it need not be sealed. Defects of closure listed below shall be examined on shipping containers fully prepared for delivery. The lot size shall be the number of shipping containers in the end item inspection lot. The inspection level shall be L–4 and the AQL shall be 4.0 defects per hundred units.

Examination	Defect
Marking	Omitted, incorrect, illegible, of improper size, location, sequence, or method of application.
Materials	Any component missing.
	Any component damaged, affecting serviceability.
Workmanship	Inadequate application of components such as incomplete closure of case liners, container flaps, loose strapping, inadequate stapling.
	Bulging or distortion of containers.
Content	Number of intermediate packages is more or less than required.[1]

[1] One intermediate package shall be examined from each shipping container in the sample.
