FEDERAL SPECIFICATION

PIPE, STEEL, (SEAMLESS AND WELDED, BLACK AND ZINC-COATED (GALVANIZED))

(This interim amendment forms a part of Federal Specification WW-P-404c, dated August 2, 1961, and Amendment-1, dated April 9, 1962. It was issued by the Department of the Navy, Bureau of Ships, in collaboration with the Defense Construction Supply Center, for immediate use pending the inclusion of its contents in a coordinated document.)

Page 7, paragraph 4.1: Delete and substitute:

"4.1 Responsibility for inspection. - Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements."

Page 7, paragraph 4.2.1, line 3: Delete "presented for inspection" and substitute "offered for delivery".

Page 7, paragraph 4.2.2, line 6: Delete "presented for inspection" and substitute "offered for delivery".

Page 7, paragraph 4.3.1: Delete and substitute:

"4.3.1 Sampling for mechanical tests (flattening, bending and tension tests). - One sample length of pipe shall be selected from each lot for the flattening, bending and tension tests specified in 4.5.3, 4.5.4 and 4.5.5."

Page 7, paragraph 4.3.2.1, line 3: Delete "for inspection".

Page 10, add new paragraph 4.6:

"4.6 Examination of preparation for delivery. - An examination shall be made to determine that preservation, packaging, packing and marking requirements shall comply with the requirements contained in Section 5 of this specification. Defects shall be scored in accordance with the following:

Check the source to verify that this is the current version before use.

The lot size shall be the number of shipping containers fully prepared for delivery, with the exceptions that containers need not be sealed or closed, nor interior containers or case liners sealed (if applicable). Examination shall be made in two phases; first an interior examination in process of packaging, and second an examination of containers fully prepared for delivery. The sample unit for each of the two phases shall be one container prepared for delivery as set forth above. The inspection level shall be S-2 of MIL-STD-105, with an acceptable quality level (AQL) of 4.0 defects per 100 units.

Examine	Defects
Marking (interior package or container and exterior container as applicable)	Omitted, incorrect, illegible, improper size, location, sequence or method of application.
Materials	Component missing, damaged, defective or not as specified.
Workmanship (as applicable)	Inadequate or improper packaging or packing, such as closure of interior packages or containers, closure of case liners or container flaps, taping of seams, corners, and manufacturer's joint, closure of alternate containers; loose strapping or tape banding; inadequate stapling; bulging or distortion of containers.
Contents (interior and exterior container as applicable)	Number per container not as specified.
Weight (exterior container)	Weight per container exceeds maximum specified.
Preservation (as applicable)	Preservation missing, improperly applied or incorrect type."
