ISO 9241-210:2019

TIER 1 ADOPTION NOTICE

International Organization for Standardization (ISO) 9241-210:2019 “Ergonomics of human-system interaction; Part 210: Human-centered design for interactive systems”, was adopted on April 1, 2026, for use by the Department of War (DoW).

This document provides requirements and recommendations for human-centered design principles and activities throughout the life cycle of computer-based interactive systems. It is intended to be used by those managing design processes and is concerned with ways in which both hardware and software components of interactive systems can enhance human-system interaction to achieve Human Systems Integration goals. This document provides an overview of human-centered design activities. The information in this document is intended for use by those responsible for planning and managing projects that design and develop interactive systems. It therefore addresses technical human factors and ergonomics issues only to the extent necessary to allow such individuals to understand their relevance and importance in the design process. It also provides a framework for human factors and usability professionals involved in human-centered design.

Proposed changes by DoW activities must be submitted to the DoD Adopting Activity at osd.mc-alex.ousd-r-e.mbx.hsi-cba2@mail.mil.
