TIER 1 ADOPTION NOTICE

SAE 1008-2022, “Standard Practice for Force Protection and Survivability”, was adopted on April 1, 2026, for use by the Department of War (DoW).

This SAE Standard specifies the Force Protection and Survivability (FP&S) processes throughout planning, design, development, test, production, use and disposal of a system. Depending on contract phase and/or complexity of the program, tailoring of this standard may be applied.

Per SAE6906, Force Protection and Survivability (FPS) is the HSI domain that facilitates system operation and personnel safety during and after exposure to hostile situations or environments. Force protection refers to all preventive measures taken to mitigate hostile actions against DoW personnel. Survivability denotes the capability of the system and/or personnel manning the system to avoid or withstand manmade hostile environments without suffering an abortive impairment of his/her ability to accomplish its designated mission. Damage due to enemy or fratricidal action, or even equipment failure, will endanger the warfighters' well-being and place them into a life-threatening situation.

Proposed changes by DoW activities must be submitted to the DoD Adopting Activity at osd.mc-alex.ousd-r-e.mbx.hsi-cba2@mail.mil. The standard may be obtained from https://www.sae.org/standards/content/sae1008 for purchase or SAE World Headquarters, 400 Commonwealth Drive, Warrendale, PA 15096-0001.

Custodians:
OUSW(R&E) – SE
Army – AI
Navy – OS
Air Force – 05

Adopting Activity:
OUSW(R&E) - SE
(Project HFAC-2026-003)

Review Activities:
Army – AFC, AI2, AI3, ALTS, AM, AR, AT, AV, CR2, CR6
Navy – MC, SH, SA, YD
Air Force – 10, 11, 13
