COMMERCIAL ITEM DESCRIPTION

GAGE, FRUIT AND VEGETABLE SIZING

The General Services Administration has authorized the use of this Commercial Item Description as a replacement for Military Specification MIL-G-36683 and MIL-G-0036683A which are cancelled.

This Commercial Item Description covers a gage suitable for verifying grade and size of fresh fruits and vegetables by veterinary personnel.

Salient characteristics:

Gage shall consist of a series of seven (7) aluminum alloy plates, held together either by a bolt-clevis, nut and two washers or by a rivet. The bolt-clevis shall be made of corrosion resistant metallic alloy. The unit gage shall provide twenty circular openings ranging in size from 1/4 inch to 3 inches in diameter and shall be suitable for verifying grade and size of fresh fruits and vegetables by the veterinary personnel. Openings shall be effected so that there shall be no bending or warping of the plates, nor distortion of edges surrounding the holes which would scratch adjacent plate surfaces in the assembled unit.

Plates in unit shall be properly assembled and adequately secured with a bolt-clevis and a thin self-locking hex nut or rivet in lieu thereof. The securing hardware shall provide that degree of tightness, to the assembled plates in the unit, as to facilitate selection of any one plate for ready use and yet not be so loose as to cause the plates to swing freely from the bolt axis. Each gage opening shall be identified by stamping the size in close proximity to the pertinent opening.

AMSC N/A FSC 6695

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Sizing numerals of 1/4 inch height shall be stamped on one side of the plate and shall be not less than 1/8 inch from the opening or edges. Stamping shall be effected so as not to cause metal to protrude from the opposite side of the plate surface.

Each unit shall be permanently marked on the back side of the last plate, with the manufacturer's name and registered trademark.

Unit shall be finished smoothly. Circular openings and edges of plates shall be free of slivers, burrs, and sharp edges.

Workmanship. The gage assembly shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Each (EA). One gage assembly, as specified, constitutes one unit.

QUALITY ASSURANCE PROVISIONS.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and (percent defective) and an inspectio product for examination purposes shall be one gage assembly.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerance specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug, and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction , the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug, and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered material. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. Intermediate/exterior package quantities and labeling and marking must be specified in the contract and/or order.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
