"b. Specify if chain assemblies or cross chains shall be furnished; the applicable MS drawing number, and part number (see 1.1 and 3.3)."

"6.4 Cross-reference. Chain assemblies classified as Type TS in MIl-C-62040A(AT) are now referred to as "chain assemblies". Cross chains classified as Type CC are now referred to as "cross chains". The classification by type was deleted because this specification only covers one type of chain assembly, a chain assembly for use on military tactical wheeled vehicles equipped with military single truck tires. The cross chain is a component of this chain assembly and is supplied as a spare part used for repairing the chain assembly.
