DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquaters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA. 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC. 20503.

1. TITLE	2. IDENTIFICATION NUMBER
POLYCHLORINATED BIPHENYL (PCB) INVENTORY REPORT	DI-MISC-80413B

3. DESCRIPTION/PURPOSE

3.1 This report contains detailed information about specific items containing PCBs. It is used for the control and eventual disposal of electrical and electronic equipment containing PCBs at government installations.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APLLICABLE
901130	F/AFSPACECOM-DEPV		

7. APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.
7.2 This item is applicable to contracts that provide for the use, handling, storage and disposal of electrical equipment containing PCB dielectrics pursuant to 40 Code of Federal Regulations (CFR) 761.
7.3 This supersedes DI-MISC-80413A

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER

10. PREPARATION INSTRUCTIONS

10.1 Format. The report shall be in a contractor devised horizontal format and shall address 40 CFR 761 and other items, as specified below.

10.2 Content. The PCB Inventory Report consists of two parts as indicated below and shall contain the installation name, EPA identification number, office, and phone number of the person preparing the inventory and date prepared. Date to be entered using the following format: yy/mm/dd.

10.2.1 In service PCB Items:

a. Serial/Id # - The identification or serial number found on the PCB item.
b. Bldg/Room No - Location of the PCB item, building is abbreviated as "B", room is abbreviated as "Rm".
c. PPM/Date - the amount of PCB contained in the PCB items or PCB contaminated items as tested, expressed in parts per million (ppm). If the item is sealed or has not been tested, information may be ascertained from the label. Date of analysis, if applicable.

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Block 10, Preparation Instructions (Continued)

d. Equipment Type - Use abbreviations: Transformer is "T", Low Voltage Capacitor is "LCA", High Voltage Capacitor is "CA" , Container is "CO, Other is "O". Explain type at bottom of report (ie. liquid or solid debris in 55 gal drums).

e. KVA Rating - Enter the Kilovoltage rating, if applicable.

f. Manufacturer - Information from equipment label, if available.

g. Fluid Trade Name - Trade name of PCB dielectric fluid if provided on label or name plate.

h. PCB Weight in Kilograms - The amount of liquid contained in the item expressed in Kilograms. To convert gallons to kilograms: gallons/0.183=Kg. The weight of dielectric fluid does not include the weight of the transformer body. Note: If the internal volume of PCBs is not known, a best estimate may be used.

i. Condition - Information from routine inspections, including leaking, non-leaking, history of failure, sealed/good condition, etc.

j. Proposed Removal Date - Enter proposed date for removal of the PCB item from service.

k. Identify the total number of and the total weight in kilograms of each specific type of PCB item and PCB items in PCB containers, including identification of container contents remaining in service at the end of the calendar year.

10.2.2 Removed from Service, Stored or Transported to Disposal:

a. Serial/ID # - The identification or serial number found on the PCB item.

b. Equipment Type - Use abbreviations: Transformer is "T", Low Voltage Capacitor is "LCA", High Voltage Capacitor is "HCA" Capacitor is "CA", Container is "CO", Other is "O". Explain type at bottom of report, (ie. liquid or solid debris in 55 gal drums).

c. Manufacturer - Information from equipment label, if available.

d. PCB Weight in Kilograms (Kg) - The amount of liquid contained in item expressed in kilograms. To convert gallons to kilograms: gallons/0.183 = Kg. The weight of dielectric fluid does not include the weight of the transformer body. Note: If the internal volume of PCBs is not known, a best estimate may be used.

e. Date Removed from Service - Enter actual date item removed from service.

f. Date Placed In Storage - Enter the date placed in storage, if removed from service and stored.

g. Date Transported - Enter the date the item was sent off base for disposal.

h. Date of Defense Reutilization and Marketing Office (DRMO) disposal - Enter date of PCB item disposal upon notification by DRMO.

i. Disposal Turn-In Document Number - Enter the DD Form 1348-1 Disposal Turn-In Document (DTID) number upon receipt of this number from the DRMO, if applicable.

Block 10, Preparation Instructions (Continued)

j. Enter the PCB Manifest Number.

k. Identify the total number by specific type of PCB items and the total weight in kilograms of PCBs in PCB Articles, the total number of PCB Article containers and the total weight in kilograms of the contents of PCB containers, and the total weight in kilograms of bulk PCB waste that was placed in storage for disposal or disposed of during the calendar year.

l. Attach all signed manifests generated by the facility during the calendar year.

m. Attach all Certificates of Disposal that have been received by the facility during the calendar year.
