INCH-POUND

MIL-P-48602 (AR)
AMENDMENT 1
15 March 1991

MILITARY SPECIFICATION

PLOTTING BOARD, XM19, W/E

This amendment forms a part of Military Specification MIL-P-48602 (MU), dated 30 September 1976, and is approved for use by the U.S. Army Armament Munitions and Chemical Command, and is available for use by all Departments' and Agencies of the Department of Defense.

PAGE 1

Title, Add: “(M19)” after “XM19”. Make this change wherever XM19 appears in the specification.

PAGE 3

*3.7*, Add the following to the end of the paragraph:

“Small cracks which may develop at the center of the disk are considered acceptable providing there is conformance to the accuracy and warpage requirements, 3.4 and 3.5 respectively, and providing that these small cracks extend no more than 1/16 inch in length from the center hole of the disk.”

PAGE 8

4.6.7, Delete in its entirety and substitute:

"4.6.7 Operability. The test shall be conducted with the plotting board assembled as specified in 3.4.a through 3.4.c. When normal finger pressure is applied to move the deflection arm scale and disk approximately 360 degrees in opposition to each other, about the pivot center, there shall be no binding or interference of rotation.Without the aide of any mechanical devices, remove and install the deflection arm scale and disk a total of ten times. After completion of the specified removal/installation cycles, the plotting board shall meet the requirements of 3.7 to be acceptable.”

PAGE 9

6.1, Change "XM224" to “M224”
