MIL-D-3135G
AMENDMENT 2
29 October 1984
SUPERSEDING
AMENDMENT 1
24 August 1984

MILITARY SPECIFICATION

DECK COVERING UNDERLAY MATERIAL

This amendment forms a part of Military Specification MIL-D-3135G, dated 21 March 1983, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 4

3.5: Delete and substitute:

"3.5 Weight. The deck covering underlay material after drying shall be of minimum practical weight, but shall not exceed the following (see 4.6.2):

Type I:
Class 1 - 1-3/4 pounds per square foot (lb/ft^2) in a thickness of 1/4-inch.
Class 2 - 2-1/2 lb/ft^2 in a thickness of 1/4-inch.

Type II - 2-1/2 lb/ft^2 in a thickness of 1/4-inch."

PAGE 7

* 4.6.1: Delete and substitute:

4.6.1 Preparation of specimens. Specimens of the sizes as specified in the following tests shall be made by mixing the deck covering underlay material in accordance with the manufacturer's instructions (see 3.2). The deck covering underlay material shall be trowelled on 1/8-inch-thick clean steel plates which have been primed with Formula 150 in accordance with MIL-P-24441 and MIL-P-24441/1 or other primer provided as part of the underlay system to a thickness of approximately 1/4 inch in one coat by means of wooden templates. The specimens shall be prepared at, be allowed to cure for 96 hours, and be tested at room temperature except those specimens required for the indentation tests specified in 4.6.4. For specimens intended for immersion tests where corrosion of the steel may occur, areas not covered by the deck covering underlay material may be protected by a suitable anti-corrosion coating.
