COMMERCIAL ITEM DESCRIPTION

Hand Wash Station, Field

The General Services Administration has authorized the use of this commercial item description (CID), by all federal agencies.

1. SCOPE

1.1 Scope. This commercial item description (CID) covers a lightweight, portable, self-contained, multi-user hand wash station.

1.2 Intended use. The hand wash station is intended to provide a means of hand sanitation for remote locations where water and waste connections are not readily available for hookup to standard wash sinks.

2. SALIENT CHARACTERISTICS

2.1 Functional Requirements. The hand wash station shall be compact and lightweight to provide for ease of handling and transportation. It shall be configured in a multi-user arrangement capable of serving four persons at a time. The multi-user station shall be equipped with a soap and towel dispenser for each person served at each wash bowl location on the stand. The wash station shall be capable of hands free operation.

Comments, suggestions or questions on this document should be addressed to US Army Research, Development and Engineering Command, Natick Soldier Center, AMSRD-NSC-CF-S, 15 Kansas St., Natick, MA 01760-5018 or emailed to Robert.Bernazzani@us.army.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at http://assist.daps.dla.mil

Check the source to verify that this is the current version before use.

2.2 Materials. All materials used to make the plastic components that come in contact with the water supply shall be U.S. Government Food & Drug Administration (FDA) food grade compliant materials. Material color shall be dessert tan or green(olive drab), or as specified in the contract or purchase order.

2.3 Dimensions. Dimensions shall be no greater than 58 inches high, and 23 inches wide by 23 inches deep.

2.4 Weight. Weight of the system shall not exceed 65 pounds when empty.

2.5 Support. The hand wash station shall be designed to be free standing. The base shall provide a stable platform when placed on level ground.

2.6 Tank. The station shall have two holding tanks approximately twenty gallons each. One tank shall contain the fresh water for hand cleaning and the other tank shall contain the grey waste water for later disposal. No bags or bladders shall be used as the storage accessory for the station. A fresh water fill plug, waste drain plug, and fresh water drain plug shall be provided for the associated holding area.

2.7 Water Dispensing System. Transfer of the wash water from the tank shall be accomplished by means of a foot powered pump attached to the base of the station. Pump capacity per foot stroke shall be two fluid ounces. The wash water shall flow up to a plastic outlet spigot for dispensing.

2.8 Waste System. Each of the sink catch bowls shall drain into the grey water tank.

2.9 Signage. A warning decal “Not for Drinking or Cooking” shall be located directly below the faucet.

2.10 Identification marking. The hand wash station shall be permanently marked with identification information. The information required shall be as follows:

National Stock Number_____
Manufacturer’s Name _____
Manufacturer’s Address_____
Manufacturer’s Model and Part Number_____

Check the source to verify that this is the current version before use.

2.11 Workmanship. The hand wash stations, shall be free of fabrication marks, cracks, dents, malformation, deep scratches or warpage. All burrs, slivers, splinters, sharp edges, dirt, grease, and foreign matter shall be removed.

2.12 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within the tolerances specified using conversion tables contained in the latest revision of ASTM SI 10.

3. REGULATORY REQUIREMENTS

3.1 Contractor recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

4.1 Product conformance. The hand wash stations provided shall meet the salient characteristics of this Commercial Item Description, conform to the producer's own drawings, specifications, standards, and quality assurance practices, and be the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4.2 Market acceptability criteria. The following market acceptability criteria are necessary to document the quality of the hand wash stations to be provided under this commercial item description.

a. The company producing hand wash stations meeting the requirements of this CID must have been producing these items for at least 2 years.

b. The company must have sold at least 250 hand wash stations meeting the requirements of this CID in the commercial or government marketplace over the last 2 years.

5. PACKAGING

5.1 Packaging. Preservation, packing and marking requirements shall be as specified in the contract or purchase order.
