MIL-B-2128C(SHIPS)
AMENDMENT-2
19 April 1968
SUPERSEDING 1/
AMENDMENT-1
15 December 1967

MILITARY SPECIFICATION

BURNERS, STEAM AND OIL PRESSURE, ATOMIZING

This amendment forms a part of Military Specification MIL-B-2128C (SHIPS), 8 March 1966.

Page 2

3.2.4, delete and substitute:

"3.2.4 The branch lines connecting the burners to the fuel oil manifold and connecting the steam lines to the steam manifolds shall be of seamless steel tubing with flanged takedown joints. Shields shall be provided for the branch line flanges. These branch lines shall be flexible enough to permit adjustment of the atomizer barrel and impeller plate assemblies by a man using one hand only applying a pull or push force not greater than 30 pounds."

Page 3

3.2.10, delete and substitute:

"3.2.10 Area factor. Each burner at rated capacity shall deliver at least 3.4 pounds of oil per hour per square inch of circular area covered by the closed burner (air doors shut) at the burner inner front plate exclusive of holding ears or points in the case of polygonal base rings. This ratio shall apply in the case of 1000 pounds per hour capacity burners but shall be increased 0.1 pound of oil per hour per square inch for each 100 pound increase in burner capacity."
