COMMERCIAL ITEM DESCRIPTION

THROMBIN, USP

The General Services Administration has authorized the use of this Commercial Item Description as a replacement for Military Specification MIL-T-37613 which is cancelled.

Salient Characteristics:

Shall be Thrombin, USP.

Shall be in accordance with the requirements of the USP.

Shall be suitable for topical use as a local hemostatic.

For Strength 1, each vial shall contain 5,000 units of sterile, lyophilized Thrombin, USP, (Bovine Origin), within the applicable assay limits.

For Strength 2, each vial shall contain 10,000 units of sterile, lyophilized Thrombin, USP, (Bovine Origin), within the applicable assay limits.

For Strength 3, each vial shall contain 20,000 units of sterile, lyophilized Thrombin, USP, (Bovine Origin), within the applicable assay limits.

Potency shall be determined in US units in terms of the US Standard Thrombin in a test comparing clotting times of fibrinogen solution. One US unit is defined as the amount required to clot 1 ml of standardized fibrinogen solution in 15 seconds. Approximately 2 US units are required to clot 1 ml of oxalated human plasma in the same period. One US unit is equal to one National Institutes of Health (NIH) units.

AMSC\NA FSC 6505

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Material shall remain stable for its labeled shelf life when stored at room temperature 15° - 30° C (59° - 86° F).

For Type I, non-sterile package containing a vial of Thrombin and a vial diluent.

For Type II, sterile package with Tyvek lid containing sterile vial of Thrombin, sterile vial of diluent and sterile transfer device in a sterile inner tray. (SEE NOTE 1).

For Type III, sterile package with Tyvek lid containing sterile vial of Thrombin, sterile vial of diluent, sterile transfer device and sterile pump sprayer cap in a sterile inner tray. (SEE NOTE 1).

The diluent supplied shall contain a preservative acceptable to the Bureau of Biologics.

All ingredients entering into the manufacture of the product shall be of a pharmaceutical grade.

Workmanship. The product shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG).

For Size 1, each package shall consist of vial containing 5,000 units of dried Thrombin, USP, and one vial containing not less than 5 ml of sterile isotonic saline diluent. One package, as specified, constitutes one unit.

For Size 2, each package shall consist of vial containing 20,000 units of dried Thrombin, USP, and one vial containing not less than 20 ml of sterile isotonic saline diluent. One package, as specified, constitutes one unit.

For Size 3, each package shall consist of sterile vial containing 20,000 units of dried Thrombin, USP, and sterile vial containing not less than 20 ml of sterile isotonic saline diluent, one sterile transfer device and one sterile pump sprayer cap. One package, as specified, constitutes one unit.

For Size 4, each package shall consist of sterile vial containing 10,000 units of dried Thrombin, USP, one sterile vial containing not less than 10 ml of sterile isotonic saline diluent, and one sterile transfer device. One package, as specified, constitutes one unit.

For Size 5, each package shall consist of sterile vial containing 5,000 units of dried Thrombin, USP, one sterile vial containing not less than 5 ml of sterile isotonic saline diluent, and one sterile transfer device. One package, as specified, constitutes one unit.

Contractor certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
