COMMERCIAL ITEM DESCRIPTION

MANIKIN, HEAD AND TORSO

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers an adult size manikin suitable for teaching cardiopulmonary resuscitation.

Salient characteristics.

The manikin shall be suitable for practicing ventilation, cardiac compression, and obstructed airway relief basic life support techniques.

The manikin shall consist of a head section connected to a thorax section. The manikin shall have life-like features. A jersey or shirt shall be provided to cover the torso.

When the device is used in the artificial ventilation mode, it shall be necessary to tilt the head back combined with a chin-lift to permit air to enter the lung. When performing artificial ventilation properly, the chest shall visibly expand. The artificial lung shall be disposable but shall also be sanitizable for reuse. The entire airway system shall be easily disassembled for sanitizing after use.

When the device is used in the external cardiac compression mode, the sternum shall exhibit the same response as a human subject. The xiphoid shall be palpable beneath the skin covering the torso section. Compression resistance shall be pre-set.

The manikin shall permit the practicing of abdominal thrusts for the care of the unconscious choking victim.

The eyelids shall open and close. The eyes shall exhibit one dilated pupil and one constricted pupil when the eyelids are open.

The manikin shall incorporate a carotid pulse simulator.

AMSC/NA FSC 6910

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The manikin shall include a sanitizing kit. This kit shall include all required equipment needed to maintain the manikin in a bacterial, fungal, and viral adequately safe condition for trainees during and after training sessions. The kit shall include, at least, a basin set for bathing contaminated elements, measuring system to obtain proper strength of sanitizing agents, syringe to flow sanitizing agents through inaccessible surface, sanitizing agents and compresses.

The manikin shall include a carrying case.

A user's manual shall be provided with the manikin. The manual shall include instructions for assembly/disassembly, storage, sanitizing procedures and a list of component part numbers.

Workmanship. The manikin shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Each (EA). One manikin head and torso with sanitizing kit and carrying case, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specification, standard, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
