COMMERCIAL ITEM DESCRIPTION

TEAKETTLE (4-QUART)

The General Services Administration has authorized the use of this commercial item description.

1. SCOPE

1.1 Scope. This commercial item description covers a 4-quart (3.8 liter) stainless steel teakettle for institutional and domestic use.

2. APPLICABLE DOCUMENTS

2.1 The documents referenced in this commercial item description shall be the issues in effect on the date of the invitation for bids or request for proposals unless otherwise specified. These documents form a part of this commercial item description to the extent specified. In the event of a conflict between this commercial item description and a document referenced herein, this commercial item description shall take precedence.

Federal Standard:

FED-STD-376 - Preferred Metric Units For General Use By The Federal Government.

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any other data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor Street, Fort Worth, TX 76102.

DISTRIBUTION STATEMENT A : Approved for public release. Distribution is unlimited.

FSC 7330

Copies of Federal standards are available from the General Services Administration Business Service Centers in Boston, MA; New York, NY; Philadelphia, PA; Washington, DC; Atlanta, GA; Chicago, IL; Kansas City, MO; Fort Worth, TX; Denver, CO; San Francisco, CA; Los Angeles, CA; and Seattle, WA, and the GSA Specifications Unit (3FBP-W), Suite 8100, 470 E. L'Enfant Plaza, S.W., Washington, DC 20407.

Military Standard:

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.

Copies of military standards may be obtained from Standardization Documents Order Desk, Bldg. 4D, 700 Robbins Avenue, Philadelphia, PA 19111-5094.

ASTM Standard:

E 29 - Standard Practice For Using Significant Digits In Test Data To Determine Conformance With Specifications.

Application for copies of ASTM standards should be addressed to ASTM, 1916 Race Street, Philadelphia, PA 19103.

3. SALIENT CHARACTERISTICS

3.1 Material. The teakettle body and cover shall be formed from stainless steel with a minimum thickness of 0.02 inch (0.5 mm). If a cantilever handle is used, it shall be made from a suitable plastic. If a bail handle is used, it shall be formed from stainless steel or a combination of stainless steel and plastic.

3.2 Construction. The teakettle shall have a minimum capacity of 4 quarts (3.8 liters). The teakettle shall have a pouring spout. The handle shall be either a bail, cantilever, or combination bail and cantilever type and shall be securely attached to the body. If a bail handle is used, it shall be vertically positioned. A cover locking device may be included within the handle at the manufacturer's option. The teakettle shall have a removable cover. The cover shape shall blend with the curvature of the kettle and shall have a flange and lip formed to prevent it from falling off when the teakettle is tilted. The cover shall be provided with a plastic knob, securely attached to the center of the cover.

3.3 Marking. The teakettle shall be marked with the manufacturer's name, trade name, or trademark of such known character that the source of manufacture may be readily determined.

3.4 Workmanship. The teakettles shall be clean and free from any cracks, fractures, malforming, scale, and pits. The items shall have no sharp edges, slivers, burrs, deep scratches, tool marks, or other defects which might affect serviceability, durability, or appearance.

3.5 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580, as amended, to the maximum extent practicable.

3.6 Measurement system. The values stated in inch-pound units are to be regarded as the standard. The values stated in parentheses are for informational purposes only.

3.7 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within tolerances specified using conversion tables contained in the latest revision of FED-STD-376, and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the specification preparing activity for changes to this document.

3.8 Commercial item. The use of the term "commercial item description" in this document does not imply that any item or items offered are not required to conform with all requirements specified herein.

4. QUALITY ASSURANCE PROVISIONS

4.1 Contractor certification. The contractor shall certify that the item meets the salient characteristics and the requirements of this commercial item description, and, except for any government unique requirements specified, conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product offered for sale in the commercial marketplace, or is the same product that has been successfully been delivered to the government on a previous contract or purchase order. The government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4.2 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the use of the contractor's own or any other facilities suitable for the performance of the inspection requirements specified herein shall be permitted, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.3 Sampling. The levels of inspection and acceptable quality levels (AQL's) shall be in accordance with MIL-STD-105.

Check the source to verify that this is the current version before use.

4.4 Lot formation. All teakettles from the same manufacturer offered for delivery at one time shall be considered a lot for purposes of inspection.

4.5 Sampling for visual and dimensional examination. A random sample of teakettles shall be selected from each lot in accordance with inspection level S-4, AQL 4.0 expressed in terms of defects per hundred units. The sample unit shall be one teakettle. The sample teakettle shall be visually and dimensionally examined for any possible defects listed in Table I and the remainder of this commercial item description. All dimensions are absolute as defined in ASTM E 29.

TABLE I. Classification of defects

Examine	Defect
Finish	Area of corrosion
	Stained or discolored
Construction and Workmanship	Scratch or tool mark on interior surface, clearly noticeable 1/
	Scratched, pitted, or tool mark on exterior surfaces
	Any sharp edge, sliver or burr
	Any part missing, or not specified size
	Any component fractured, split, bent, buckled, punctured or otherwise impaired
Marking	Missing or illegible
Handles	Not securely attached

1/ - An unacceptable scratch is one that will catch a fingernail when run across it.

4.6 Examination for preparation for delivery. A random sample of shipping containers shall be selected from each lot for examination of the unit, intermediate and shipping containers (as applicable) for conformance with the preservation, packaging, packing, labeling, and marking required in the contract or order. Samples shall be selected in accordance with inspection level S-2, acceptable quality level (AQL) 6.5, expressed in terms of defects per hundred units.

5. PREPARATION FOR DELIVERY

5.1 Packaging, packing, and marking. The packaging, packing, and marking shall be as specified in the contract or order.

6. NOTES

6.1 Ordering data. Purchasers should include the following information in procurement documents (if applicable).

a. Title, number and date of this commercial item description.
b. The packaging, packing, and marking desired.

6.2 National Stock Number: The following NSN corresponds to the item described by this CID: 7330-00-240-2102.
