DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188
Exp. Date: Jun 30, 19

1. TITLE	2. IDENTIFICATION NUMBER
Facility Accreditation Documentation	DI-ADMN-80237

3. DESCRIPTION/PURPOSE

3.1. This Data Item Description (DID) identifies the format and content requiremen covered by the specific and discrete task for the contractor to prepare this data product identified in the contract Statement of Work (SOW).

(continued on page 2)

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC REQUIRED	6b. GIDEP REQUIRE
860915	A/ASBH-RMT		

7. APPLICATION/INTERRELATIONSHIP

7.1. This DID contains the format and content preparation instruction for the data product generated by the specific and discrete task requirement for this data included in the contract.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		A3961

10. PREPARATION INSTRUCTIONS

10.1 Contract. This data is generated by the contract which contains a specific a discrete work task to develop this data product.

10.2 Content and Format. Content and Format shall be as described below:

10.2.1 Section I - Executive Summary.

a. Key Vulnerabilities. A summary of key vulnerabilities identified during t risk analysis process and exceptional circumstances pertaining to operating the system(s) in the facility at the stated level. A discussion of actions taken to minimize these risks must be included along with a description of the exceptional circumstances, if any, justifying operation in the environment.

b. Mode of Operation. Describe options and procedures in use at the facility as follows:

(1) Log-on attempts.

(2) Procedures, if processing in a lower sensitivity level.

(3) Major software systems, executive, and applications.

(4) Use of data encryption if any.

(5) Security features.

(6) Use of local nationals.

3. DESCRIPTION/PURPOSE (Cont'd)

3.2. This DID defines the data required to obtain facility accreditation in accordance with AR 380-380, "Automation Security." Regulation can be obtained from: Commander, USAAG Publications Center, 2800 Eastern Blvd., Baltimore, MD 21220-2896.

---

10. PREPARATION INSTRUCTIONS (Cont'd)

10.2.1. (cont'd)

c. Waivers Requested. Identify title, number and date of waivers granted to the facility.

10.2.2. Section II - Accreditation Objective.

a. Background. Description of relevant events leading to and the objective of this accreditation; the essential nature of the mission and other factors motivating this accreditation. Other operational alternatives (for example, split system, procurement of separate computer) considered prior to selecting this course of action. Rationale for rejecting other operational alternatives.

b. Proposed System Operation. Detailed information concerning features of operational and security modes to be implemented, to include description of system(s) hardware and software, significant applications, and system(s) interfaces. Also included, should be the location of all remote devices.

10.2.3. Section III - Risk Management Review. Threat identification (all external and internal threats) will include a detailed vulnerability analysis, risk assessment, and countermeasures associated with each threat.

10.2.4. Section IV - Implementation of Security Controls and Countermeasures.

a. Security Features. Description in detail of the security management, software, hardware, procedural, communications, personnel, document, and physical and environmental security features in existence and to be implemented which will support site operations to include mode of operations and the request for waivers. Refer to the applicable chapters of AR 380-380 and complete the Facility Security Profile.

b. Implementation Plan. Description of security phases, recommend countermeasures and alternatives, cost and time estimates to implement these measures, milestones, initial and final operational capabilities, task interdependencies, and organizations responsible for accomplishing milestone-related tasks.

c. Problem Areas. Identify problems potentially disruptive of accreditation tasks, processes, and time-tables.

10. PREPARATION INSTRUCTIONS (Cont'd)

10.2.5. Section V - System(s) Test and Evaluation (ST&E) Plan.

a. Test Requirements. A statement of the purpose, scope, objectives and requirements of the test.

b. Test Methodology. Identify the following:

(1) Test method to be used.

(2) Investigative and analytical approaches to be used.

(3) Support requirements, if any.

c. Test Findings.

d. Conclusions.

e. Recommendations.

10.2.6. Section VI - Attachments. No document shall be attached that has not be referenced in the body of the accreditation document (such as, in sections I, II, III, IV, or V). These documents should include:

a. Facility Security Profile.

b. Standard Operating documents.

c. Other supporting documents:

(1) Automated Data Processing System Security Officer (ADPSSO) appoint orders.

(2) A copy of each inspection report (such as TEMPEST, fire).

(3) Glossary containing a list of abbreviations or terms.

(4) Other supporting documents, if required.
