DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188
Exp. Date: Jun 30, 1

1. TITLE	2. IDENTIFICATION NUMBER
Facility Security Profile (FSP)	DI-ADMN-80238

3. DESCRIPTION/PURPOSE

3.1. This Data Item Description (DID) identifies the format and content requiremer covered by the specific and discrete task for the contractor to prepare this data product identified in the contract Statement of Work (SOW).

(continued on page 2)

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC REQUIRED	6b. GIDEP REQUIRE
860915	A/ASBH-RMT		

7. APPLICATION/INTERRELATIONSHIP

7.1. This DID contains the format and content preparation instruction for the dat product generated by the specific and discrete task requirement for this data included in the contract.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		A3962

10. PREPARATION INSTRUCTIONS

10.1 Contract. This data is generated by the contract which contains a specific a discrete work task to develop this data product.

10.2 Content and Format. Content and Format shall be as described below:

10.2.1 Introductory Information. Introductory information shall describe the purpose, scope and objective of the FSP.

10.2.2. Facility Identification and Location. Enter the facility identification number (if known) and location of the facility. (Building number, military reservation, or city and state).

10.2.3. Architectural Drawings or Building Plans. Plans of the building housing tl facility shall be drawn to scale and sufficiently detailed showing the locations of exits, guard posts, fire alarms and hoses, master utility panels, and facilities adjacent to, above, and below. Hand drawn diagrams are not acceptable.

10.2.4. Facility Floor Plan. The floor plan shall be drawn to scale and sufficiently detailed to show placement of all equipment, desks, cabinets, tables, fire extinguishers, and sprinklers, smoke and motion detection devices, emergency lighting and so forth. Hand drawn diagrams are not acceptable.

10.2.5. System Logical Interface Diagrams. The diagram(s) shall show all major equipment (processing units; terminals; peripherals; communications modems; controllers or concentrators; transmission lines; line filters; encryption devices, and so forth) and their interfaces. Hand drawn diagrams are not acceptable.

Check the source to verify that this is the current version before use.

3. DESCRIPTION/PURPOSE (Cont'd)

3.2. This DID defines the data required to develop a Facility Security Profile (FSP) to document the physical facility, equipment components, their locations and relationships, general operating information, and other characteristics relevant to the security of the facility and its operations in accordance with AR 380-380, "Automation Security." Regulation can be obtained from: Commander, USAAG Publications Center, 2800 Eastern Blvd., Baltimore, MD 21220-2896.

---

10. PREPARATION INSTRUCTIONS (Cont'd)

10.2.6. Other Diagrams. If applicable, additional diagrams shall be prepared to scale and sufficiently detailed showing specialized displays of communications, electrical wiring, special communications switching, or patching panels. Hand drawn diagrams are not acceptable.

10.2.7. Equipment Inventories. All system(s) and related equipment in the facility shall be inventoried by manufacturer type and model number. Specialized support equipment such as degaussers and tape and disk cleaners shall be included. Inventory list shall show location, manufacturers type and model number.

10.2.8. Storage Media. Types (magnetic tapes, disk packs) and approximate numbers shall be shown by sensitivity category (for example, magnetic tapes=total 1,000; 25 SECRET, 50 CONFIDENTIAL, 25 Privacy Information, 100 asset or resource information, 800 other).

10.2.9. Amounts and Types of Sensitive Processing. Wall clock time will be used to estimate processing time for each classification and restrictive category of information.

10.2.10. Executive Software.

a. Operating System. List the release or level number and date first put into operation on the system.

b. Operating System Type. Describe if standard off-the-shelf or the nature of any local modifications.

c. Other Major Executive software. List supervisors, non-hardware input or output controllers, query language processors, teleprocessing packages, and output spooling routines.

10.2.11. Utility Software.

a. Data Management Systems or Data Base Management Systems. Identify vendor, system name, release number, and date made operational.

b. Other Major Utility Software. List general software which supports both executive and applications software (such as, sort and merge routines, interpreters, compilers, converters, and report and report program generators).

Check the source to verify that this is the current version before use.

c. Applications Software. List any major applications programs or systems, indicating average processing time, security level, and restrictive category (such as, privacy information, asset, or resource information).

10.2.12. Personnel Security and Surety Plan. Provide the details and status of Personnel Security and Surety Plan (PSSP), in accordance with Chapter 4, AR 380-3

10.2.13. Appendices. The following appendices shall be included:

a. Glossary containing a list of abbreviations or terms.

b. Additional appendices shall be used, if applicable, to furnish examples, charts, exhibits, flow charts and scenario(s) that provide additional supportive data.
