DATA ITEM DESCRIPTION
Title: TECHNICAL DIRECTIVE COMPLIANCE REPORTS

Number: DI-MGMT-80224C
AMSC Number: N10230
DTIC Applicable: No
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20210329
Limitation: N/A
GIDEP Applicable: No
Project Number: MGMT-2021-006

Use/relationship: The Technical Directive Compliance Reports (TDCR) contain the data required to report the status of compliance with Naval Air Systems Command (NAVAIR) Technical Directives.

The contractor reports to the government all technical directive compliances accomplished on government owned equipment in the custody of the contractor and approved by the government for the incorporation in the article(s) of the contract by submitting a technical directive compliance report as soon as possible after completion of actions directed in the technical directive.

This DID contains the format, content, and intended use information for the data deliverable resulting from the work task described in the contract.

This DID supersedes DI-MGMT-80224B.

Requirements:

1. Reference documents. None.

2. Format. Contractor format is acceptable.

3. Content. The TDCR shall include the status of all Technical Directive (TD) Compliances to include the following:

3.1. TDCR Data Elements. The TDCR shall contain the following data:

3.1.1. Type Equipment Code – a four-character code, which identifies the type equipment being modified (example: F-14A = AFWA).

3.1.2. Serial Number – six characters, which identifies the specific equipment being modified. For Serial Numbers less than six characters precede with zeroes. For Serial Numbers greater than six characters, use last six characters.

Check the source to verify that this is the current version before use.

3.1.3. TD Code – Enter two digits corresponding to the TD type (See Figure 1) (example: Airframe Change = 50).

3.1.4. Basic Number – a four digit number identifying a specific TD (example: TD 107 = 0107).

3.1.5. Interim – I, if interim TD, otherwise leave blank.

3.1.6. Revision – alphabetic character identifying the TD if revision, otherwise leave blank.

3.1.7. Amendment – numeric character identifying the TD if amendment, otherwise leave blank.

3.1.8. TD Part Number – two characters used to identify the TD, if TD was issued as parts, otherwise leave blank.

3.1.9. Kit Number – two characters identifying the kit installed (example: A1). If no kit is required, enter 00.

3.1.10. Incorporating Activity – six characters identifying the activity incorporating the TD.

3.1.11. Incorporation Date – four digits in the form MMYY (example: April 2003 = 0403).

3.1.12. Work Unit Code – up to seven alphanumeric characters.

3.1.13. Comply Status – C (for current compliance), P (for previous compliance), or D (not applicable).

3.1.14. Man-hours – four numeric characters. If less than four characters precede with zeroes (example: 10 = 0010).

3.1.15. Maintenance Level – 5 (Contractor Incorporated) or 6 (Contractor Mod Team).

3.2. The following data elements are required when reporting a component TD (example: Avionics)

3.2.1. Component Serial Number – up to 10 alphanumeric characters identifying the component being modified.

3.2.2. Inducted CAGE – 5 characters.

3.2.3. Inducted Part Number – up to 15 characters, identifying the inducted part.
