DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. TITLE	2. IDENTIFICATION NUMBER
Technical Order Improvement Report and Reply	DI-TMSS-80229B

3. DESCRIPTION/PURPOSE

3.1 To advise the Air Force of technical errors and omissions in Technical Orders (TO) which prevent or hinder accomplishment of taskings and functions specified by the contract.

3.2 To suggest TO enhancements which facilitate or reduce costs of contract performance.

3.3 **NOT** used to report minor TO errors or omissions, technical or non-technical, which do not affect job performance.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
970312	F-ESC/AV-2		

7. APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 This item is applicable to contracts where the contractor is responsible for operating and maintaining Air Force centrally-acquired and managed equipment according to procedures in published TOs. Additional information and guidance is contained in TO 00-5-1, available on the WWW at *http://www.pdsm.wpafb.af.mil/to-system.html.*

7.3 This data item supersedes DI-TMSS-80229A.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
	AFTO Form 22	F7247

10. PREPARATION INSTRUCTIONS

10.1 Format. Paper or electronic format (EF) AFTO Form 22, Technical Order Improvement Report and Reply, or message/e-mail containing the same information.

10.2 Content.

10.2.1 Block 1, REPORT DATE. The date the Improvement Report Number is assigned.

10.2.2 Block 2, TO (*Major Command or Equivalent*). The complete address of the Administrative or Procuring Contracting Officer (ACO/PCO).

10.2.3 Block 3, TO (*T.O. Manager*). The address of the responsible TO Manager as indicated by the applicable TO Index. (Addresses are available on the Air Force TO System Practices & Procedures WWW Home Page, *http://www.pdsm.wpafb.af.mil/to-system.html.*)

10.2.4 Block 4, FROM (*Product Improvement Manager or Equivalent*). The address of the reporting organization's Quality Assurance function which reviewed and approved the form for submission.

10.2.5 Block 5, BASIC DATE OF T.O. The first date appearing on the lower right corner of the TO Title page.

10.2.6 Block 6, DATE/NO. OF CHANGE. The change number and date, if any, appear just under the TO's basic date. If there is no change listed, block 6 may be left blank or have N/A entered.

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Block 10, Preparation Instructions (Continued)

10.2.7 Block 7, PAGE NUMBER. The first page affected by the proposed change. Additional pages should be indicated in Block 11. For work cards, the routine number and card number (e.g., TR3.1, Card 2 of 3).

10.2.8 Block 8, PARAGRAPH NO. The number of the paragraph to be changed or which precedes added material, the grid number for microfiche, or the System/Subsystem/Subject Numbers (S/S/SN) for manuals using this system. When multiple paragraphs are affected, the range (e.g., 5-1 thru 5-5).

10.2.9 Block 9, FIGURE NO. Used when illustrations or tables are involved. "Table" is used before the number if applicable.

10.2.10 Block 10, TECHNICAL ORDER DATA. The TO number (Record Positions (rp) 6-30) and the improvement report number (rp 31-45). Only one character is used in each position. Rp 5 is left blank. Capital letters and slashed zeros (Ø) (if completing by hand) are used. Specific entry formats:

a. TECHNICAL ORDER NUMBER. The basic TO number (only) as it appears on the title page. Parentheses and dashes are used, but not blanks. Unused positions through rp 30 are left blank. When a change affects a TO supplement, the supplement's number is referenced in block 11.

b. IMPROVEMENT REPORT NUMBER. All positions (rp 31-45) are alpha-numeric characters (only). Rp 31 is a pre-printed "2." Rps 32-33 will be "4N" to indicator contractor submission. Rps 34-38 will be the contractor's Commercial And Government Entity (CAGE) code number from the H4/H8 cataloging handbooks. Rps 39-40 may be used for internal identification or may be zeros. Rp 41 is the last digit of the calendar year. Rps 42-44 are the sequential numbers (starting with "001") of the reports submitted in the calendar year. Rp 45 indicates the urgency category of the report (E for Emergency, U for Urgent, P for Priority or R for Routine).

10.2.11 Block 11, BRIEF SUMMARY OF DEFICIENCY AND RECOMMENDED CHANGE (*Use continuation sheet, if needed*). Completed as follows:

a. For work package TO reports, the first entry in this block is "APPLICABLE TO WP NUMBER xxxxx."

b. Identity of the military system when this is not included in the TO number. If not a system, identity of commodities by Mission/Design/Series (MDS) or Type/Model/Series (TMS) and National Stock Number (NSN) or part number. Omitted for general purpose Methods & Procedures TOs (MPTOs).

c. Brief description of the TO deficiency and reason for change. When appropriate, identity or copy attached of the source document for changes in voltage, part number and so forth.

d. The recommended changes worded as closely as possible to the exact language which should appear in the corrected TO. If the correction will require engineering research or extensive verification, the type of correction ("Add more in-depth fault isolation procedures.") and a statement such as "Unable to develop at local level."

e. Continuation sheets, if needed, shall show the improvement report number in the upper right hand corner of each sheet. (The EF version of the AFTO Form 22, available from the ACO/PCO, includes a continuation sheet with automatic entry of the improvement report number.)

10.2.12 Block 12, SUGGESTION NUMBER. No longer used.

10.2.13 Block 13, REPORTED BY (*Initiator's Signature, Off Symb, Phone*). Signature, printed or typed name, and office symbol of the individual reporting the problem or enhancement. Telephone number (Defense Switched Network (DSN) number preferred, if available) where individual can be contacted during normal duty hours.

Check the source to verify that this is the current version before use.

10.2.14 Block 14, APPROVED BY (*Supervisor's Signature, Off Symb/DSN*). Same as Block 13 for the initiator's supervisor.

10.2.15 Block 15, PIM OR EQUIVALENT (*Signature/Off Symbol/DSN*). Same as Block 13 for the Product Improvement or Quality Assurance representative who reviews and approves the form for submission.

10.2.16 Blocks 17 & 18, TO. These blocks contain the same addresses as Blocks 2 and 4. They are auto-filled by the EF version of the form.

10.3 (Information Only).

10.3.1 Block 16, MAJOR COMMAND ACTION. Blocks 16A through 16C will be completed by the ACO or PCO having oversight of the contract.

10.3.2 PART II, Blocks 19 thru 27. Completed by the government during evaluation of the improvement report.
