COMMERCIAL ITEM DESCRIPTION

SCALE REMOVING COMPOUND (LIQUID)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification P-S-120.

This commercial item description covers a low-foaming concentrated liquid scale removing compound designed primarily for the removal of lime scale build-up, stain, and rust from environmental surfaces, commercial dishwashing machines, and boiler coils.

Salient characteristics:

The scale removing compound shall consist of phosphoric acid in combination with various acids, corrosion inhibitors and wetting agents.

Phosphoric acid (as P_2O_5). The scale removing compound shall have a phosphoric acid content not less than 33.0 percent using ASTM D 820 Electrometric Titration Method.

pH. The scale removing compound shall have a pH (1 percent aqueous solution) not greater than 2.0 using ASTM E 70.

Surface tension. The scale removing compound shall have a surface tension [25° C (77° F), 1 percent aqueous solution] not greater than 44.0 dynes per centimeter using ASTM D 1331.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conform to the producer's own drawings, specifications, standards and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Packaging, packing, and marking. The scale removing compound shall be packaged and packed in accordance with normal commercial practice to insure delivery at destination, to prove for redistribution by the initial receiving activity, and shall be acceptable by common carrier under the National Motor Freight Classification and Uniform Freight Classification, Marking shall be as specified in contract or order.

ASTM Standards are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.

Acceptable brand name products:

Economics' Lime-A-Way
Dubois' L/S/R
National Laboratories Lime Shine
Calgon's Scale-Gon
Wyandotte's Sentol

FSC 6850
