DETAIL SPECIFICATION

MANUALS, TECHNICAL: RAPID ACTION CHANGES AND INTERIM RAPID ACTION CHANGES; PREPARATION OF; GENERAL SPECIFICATION FOR

This specification is approved for use by the Naval Air Systems Command, and is available for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers the requirements for the preparation of Rapid Action Changes (RACs) and Interim Rapid Action Changes (IRACs) to Technical Manuals (TMs) under the cognizance of the Naval Air Systems Command (NAVAIRSYSCOM) (see 6.1.1, 6.1.2, and 6.1.3 for information pertaining to applicability, exceptions, and exclusions). RACs and IRACs are processed using the Joint Deficiency Reporting System (JDRS) website (http://www.jdrs.mil.). Address requests for waiver or deviation from this policy to the Product Data Competency, COMNAVAIRSYSCOM (AIR-6.8.5) in accordance with NAVAIR 00-25-604.

1.2 Classification. Rapid Action Changes to Technical Manuals covered by this specification are of the following types:

a. RAC - issued by Naval activities or Contract Administrative Offices (CAOs) as a complete formal change to a TM (including all associated front matter).

b. IRAC - issued by Naval activities or Contract Administrative Offices (CAOs) as an interim change to provide urgent TM change data.

Comments, suggestions, or questions on this document should be addressed to: Commander, Naval Air Systems Command, Code 412000B120-3 Highway 547, Joint Base MDL, NJ 08733-5100 or emailed to michael.sikora@navy.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at https://assist.dla.mil.

AMSC N/A AREA TMSS

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

(1) Type A IRAC – issued as a Naval Message to provide urgent TM change data, with the exception of graphic images, schematics, wiring diagrams, etc., which are not for delivery by Naval Message.

(2) Type B IRAC – issued as urgent TM change data that cannot be released as a Naval Message, e.g., changes to schematics, wiring diagrams, graphic images, or other information which may only be conveyed through the release of replacement pages or added pages prepared in the same style and format as the existing TM. Only the technical content change information is to be provided. The manual title page and front matter are not to be included.

2. APPLICABLE DOCUMENTS

2.1 General. The documents listed in this section are specified in sections 3 and 4 of this specification. This section does not include documents cited in other sections of this specification or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet all specified requirements of documents cited in sections 3 and 4 of this specification, whether or not they are listed.

2.2 Government documents.

2.2.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

DEPARTMENT OF DEFENSE SPECIFICATIONS

MIL-DTL-23618	-	Manuals, Technical: Periodic Maintenance Requirements, Preparation of
MIL-DTL-81927	-	Manuals, Technical: Work Package Style, Format, and Common Technical Content Requirements; General Specification for (Work Package Concept)
MIL-PRF-85337	-	Manuals, Technical: Quality Assurance Program, Requirements for

DEPARTMENT OF DEFENSE STANDARDS

MIL-STD-38784	-	Manuals, Technical: General Style and Format Requirements

DELETED HANDBOOK

(Copies of these documents are available online at http://quicksearch.dla.mil.)

2.2.2 Other Government documents, drawings, and publications. The following other government documents, drawings, and publications form a part of this document to the extent

Check the source to verify that this is the current version before use.

specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

NAVAL PUBLICATIONS

NTP 3 (J)	-	Naval Telecommunication Procedures, Telecommunications Users Manual

(Copies of this document are available online at https://ndls.nwdc.navy.mil.)

NAVAL AIR SYSTEMS COMMAND

NAVAIR 00-25-100	-	Naval Air Systems Command Technical Manual Program
NAVAIR 00-25-604	-	Naval Air Systems Command Fleet Support/Integrated Program Team Acquisition and Sustainment of NAVAIR Technical Manuals

(Copies of these documents are available with an account at https://mynatec.navair.navy.mil.)

2.3 Order of precedence. Unless otherwise noted herein or in the contract, in the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. REQUIREMENTS

3.1 Approved conditions for issuance of RACs or IRACs. RACs and IRACs shall be developed to expedite the issuance of technical information when one or more of the following conditions exist:

a. Hazards to safety of personnel (see 6.4.4);
b. Impairment of safety of flight (see 6.4.5);
c. Aircraft grounding (see 6.4.1);
d. Mission capability or fleet readiness (see 6.4.6);
e. Equipment damage (see 6.4.3), or
f. Environmental impact restrictions (see 6.4.2).

3.2 Conditions not approved for issuance of RACs and IRACs. A RAC or IRAC shall not be issued for the following:

a. Update of data pertaining to hardware familiarization, such as: theory of operation; description of an existing unit or control unless required in conjunction with revised installation, assembly, disassembly, or maintenance procedures;
b. Format changes;
c. Grammatical changes (unless safety, equipment damage, flight limitation, etc, are involved);
d. Typographical errors;
e. General non-procedural information;

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

f. Naval Air Training and Operation Standardization (NATOPS) flight and tactical manuals. These are excluded from this specification. Refer to OPNAVINST 3710.7.

3.3 RAC/IRAC determination. The determination to issue a RAC or an IRAC shall be made by the cognizant TM preparing activity in coordination with the program Technical Data Logistic Element Manager (LEM). Formal Revisions and Changes are the preferred means of distributing change data to the user community in order to maintain effective configuration control throughout the TM update and distribution process, and for ease of use by the maintainer. RACs provide similar benefits to the maintenance community, and are preferred where circumstances warrant their use.

3.3.1 RACs. RACs are complete, formal changes to applicable technical manuals and are preferred over IRACs for releasing urgent data. In addition to the pertinent technical content change information, RACs provide all the associated technical manual format data, such as title page, front matter, indices, etc. RACs shall be used to disseminate urgent TM change information when funding, contractual and programmatic conditions make their use practical. Distribution of electronic and hard copy RACs shall be in accordance with current NATEC web-posting guidelines found on NATEC Technical Manual Application System (TMAPS) website. Though RACs are considered formal changes, they do not require entry into the publication plan and Technical Data LEMs are not required to update all outstanding source data. RACs under 60 pages can be distributed digitally unless there are special printing restrictions, e.g. excessive color, lamination, long foldouts, etc.

3.3.2 IRACs. IRACs may be used when funding, contractual, and programmatic circumstances make the use of RACs impractical in order to disseminate urgent safety and readiness data quickly. Considerations need to be given to utilizing the applicable IRAC type that will enhance user comprehension. Formal incorporation of an IRAC into the TM is still required and shall be accomplished by a formal change, revision, or RAC. IRACs are of two (2) types:

a. Type A shall be used to disseminate information for distribution by Naval Message. Upon receipt of an applicable Type A IRAC, technical manual users are directed to annotate the IRACs applicability to affected pages and maintain the IRAC behind the title page of the manual in accordance with NAVAIR 00-25-100. Generally, Type A IRACs provide information that applies to text and routine tabular information. However, Type B IRACs should be used if they provide a means to more clearly display or articulate the information to the user. Type A IRACs shall not be used for any form of illustrations, schematics, wiring diagrams, or other graphics images.

b. Type B shall be used to disseminate information that includes illustrations, schematics, wiring diagrams, and other forms of graphic data that cannot be included in a Type A IRAC. Generally, type B IRACs more clearly articulate the information for better user comprehension. However, they are not a formal change to the TM as they do not include the title page and associated front matter. Upon receipt of an applicable Type B IRAC, technical manual users are directed to annotate the IRAC's applicability and insert enclosed change pages in accordance with NAVAIR 00-25-100.

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

3.4 TM incorporation. RACs and IRACs shall be collated into affected TMs immediately upon receipt. IRACs shall be formally incorporated into affected TMs during the next formal update but no later than 12 months after their release date whichever comes first. This shall be accomplished by issuance of a routine change, revision or pickup revision, in conjunction with the incorporation of additional source data, as applicable.

a. Formal updates shall include incorporation of all outstanding IRACs pertaining to the TM. Any IRACs not incorporated during a manual update, or issued after the TM data cutoff date (copy freeze date), shall be reconciled by cancelling then reissuing them as a new IRAC with a new IRAC number issued through the JDRS website http://www.jdrs.mil in accordance with NAVAIR 00-25-604. The new IRAC shall be linked against the updated TM/IETM version prior to the TM/IETM official release/upload to the NATEC website. See 3.5.3 for procedures covering cancelled RAC and IRAC numbers.

3.5 RAC and IRAC identification.

3.5.1 RAC and IRAC numbering. RACs and IRACs shall be numbered consecutively throughout the life of the TM beginning with RAC or IRAC number 1. Sequence of numbers is independent of type of RAC or IRAC, e.g., number 1 could be a Type A IRAC, number 2 a RAC, number 3 a Type B IRAC, etc.,. All numbers shall be assigned through the use of the JDRS website http://www.jdrs.mil. The program Technical Data Logistics Element Manager (LEM) or designee approved by the program LEM has final authority regarding RAC and IRAC numbering. Cancelled RAC and IRAC numbers shall not be reused.

3.5.2 RAC and IRAC date.

a. The RAC date shall be the date the RAC number was assigned by JDRS.

b. The IRAC Type A date shall be the Date Time Group (DTG) of the Naval Message as assigned by JDRS.

c. The IRAC Type B date shall be the date the IRAC number was assigned by JDRS.

3.5.3 Cancelled RACs and IRACs.

NOTE: An IRAC can only be corrected by the issuance of another IRAC to cancel or cancel and supersede the existing IRAC. Messages that are not IRACs cannot be used to correct, supplement, or cancel an existing IRAC.

a. If a RAC is issued with obsolete, incorrect, or incomplete data, it shall be corrected by issuing a new RAC with the next RAC number in sequence with the affected pages corrected. The TM title page shall contain a supersedure statement, which reads, “This RAC supersedes RAC No_.” Minor errors not affecting technical content may be corrected by issuing a NAVAIR TM Notice in accordance with NAVAIR 00-25-604.

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

b. If an IRAC is issued with obsolete, incorrect, or incomplete data, it shall be cancelled and superseded by issuing a new IRAC with the next IRAC number in sequence. A Type A or a Type B IRAC may be used to cancel either type of IRAC. Format the new IRAC in accordance with 3.6 and the following:

(1) Within the PURPOSE OF CHANGE include the following: "This IRAC [cancels] or [cancels and supersedes] IRAC X." (*insert the cancelled IRAC number in place of X*). If more than one IRAC is being cancelled, each shall be listed.

(2) Within the DETAILED INFORMATION include the following as a new paragraph prior to the mandatory lead-in sentences: ""IRAC X *(insert the cancelled IRAC number in place of X)* is [cancelled] or [cancelled and superseded] by this IRAC. Using bold letters mark the first page of IRAC X with "CANCELLED BY IRAC Y" *(insert cancellation IRAC number in place of Y)*. Ensure that the IRAC number and Purpose of Change statement of the cancelled IRAC are visible (note that the Purpose of Change statement may be on the second page). In the appropriate margin of each page that the cancelled IRAC affected indicate that it has been cancelled by this IRAC. Retain only the cancelled IRAC page(s) with the "Cancelled by IRAC" and "Purpose of Change" statements; all other cancelled IRAC pages shall be removed and discarded."" If more than one IRAC is being cancelled, each shall be listed.

c. IRACs not incorporated during a manual update, or issued after the TM data cutoff date (copy freeze date), shall be reconciled by cancelling then reissuing them as a new IRAC with the next IRAC number in sequence against the updated manual. The new IRAC number shall be issued through the JDRS website http://www.jdrs.mil against the current change or revision of the affected manual in accordance with the Technical Manual Conversion/Preparation for Web Posting procedures in NAVAIR 00-25-604.

d. IRAC issuing activities shall update the official digital title page of each cancelled IRAC with a digital watermark consisting of two lines, centered; first line shall be: "CANCELLED"; second line shall be: "BY IRAC X" *(insert cancellation IRAC number in place of X)*. Set font of watermark to "Arial", rotation to 45 degrees, opacity to 58 percent, scale relative to target page 100 percent.

e. A PDF file of the complete manual with all applicable IRAC(s) appropriately collated and bookmarked shall be uploaded to the NATEC website in accordance with NAVAIR 00-25-604. Only the (appropriately watermarked) title page of each cancelled IRAC shall be included in the collated PDF file. If the "Purpose of Change" statement of the cancelled IRAC is on the second page, retain that page as well. All other pages of the cancelled IRAC shall be removed. A blank back-up page may be required behind the cancelled title page to preserve accurate pagination.

NOTE: In all cases where a RAC or IRAC is cancelled, the user shall receive all information that may have been previously discarded as a result of the direction given in the cancelled RAC or IRAC. This will ensure users have all pertinent data, regardless of the issuance and subsequent cancellation of a RAC or IRAC.

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

3.6 IRAC/RAC preparation. RACs and IRACs shall be processed using the JDRS website http://www.jdrs.mil. Requests for waiver or deviation from this policy shall be addressed to the Product Data Competency, COMNAVAIRSYSCOM (AIR-6.8.5) in accordance with NAVAIR 00-25-604.

3.6.1 IRAC.

a. Type A shall be prepared using the Naval Message format as defined in this specification. Type A IRACs should normally not exceed five pages (excluding distribution).

b. Type B shall be prepared using the format as defined in this specification. Type B IRACs should normally not exceed 40 pages including all replacement, added, and back-up pages.

3.6.1.1 Type A IRAC format and arrangement. Format requirements for naval messages are defined in NTP 3 (J), Naval Telecommunications Procedure, Telecommunications User's Manual. The following shall be included and formatted in accordance with the NTP 3 (J) procedures manual (see figure 1 as an example):

a. IRAC issuing activity information. The Naval Message shall contain the Plain Language Address Designator (PLAD) and code of the issuing activity.

b. Action addressee. The Naval Message shall include, but not be limited to, Address Indicator Group (AIG) number 165 and any supplemental AIGs that may be involved if such an AIG has been established. The following shall be addressed in the information line: Commander, Naval Air Pacific and Atlantic Fleets; Commander, Naval Training Activity; Commander, Naval Air Reserve Force; and Commander, Naval Air Systems Command.

c. Security classification. The security classification of an IRAC shall be determined from the content of the change. Classification of the IRAC shall not exceed the classification of the affected TM. The security classification of an IRAC can be lower, but not higher, than the security classification of the TM being changed. Security marking shall be in accordance with current security.

d. Standard Subject Identification Code (SSIC). The SSIC for IRAC messages shall be "5600".

e. Subject. The subject lines for Naval Messages must be clear, short, and to the point. The subject for Type A IRACs shall be, "IRAC (IRAC number) TO (NAVAIR TM number) DTD (date of issue) WITH (latest formal change number and date if applicable)."

f. Remarks. The subject line shall be duplicated and inserted into the beginning of the remarks section of the message. The acronym, "IRAC" shall be spelled out and, if appropriate, the title of the applicable manual may be included following the TM number.

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

g. Responsible Code. Information concerning the person(s) responsible for the IRAC shall be provided, including: name, activity name, code, DSN and commercial phone numbers, fax number, and e-mail address.

h. Condition and purpose of change. For guidance pertaining to cancellation IRACs refer to 3.5.3. The IRAC shall state the specific condition and the purpose of the change, as follows:

"TO CORRECT/PREVENT (cite condition based on 3.1 and provide a brief explanation)". Example: To correct/prevent an equipment damage condition by providing a new operational test procedure that eliminates the potential for damage.

i. Detailed information. For guidance pertaining to cancellation IRACs refer to 3.5.3:

(1) The following shall be included verbatim in all IRACs as the lead-in sentences addressing the technical content changes:

"Pen and ink changes to the technical content of a manual are not authorized. The following technical content change information applies to the following referenced pages and paragraphs of the subject manual until the formal update is released."

(2) The exact location and description of the change shall be written in detail.

(3) The text of the IRAC shall be clear, accurate, concise, and shall be worded in the same style and format as the affected publication. Good judgment shall be used to maintain continuity of the actions to be taken and adequately cover the intended change.

j. Validation. IRACs shall be validated in accordance with MIL-M-85337 prior to release. The name of the person who performed validation of the IRAC, including activity name, code, telephone number, and e-mail address shall be provided in the IRAC.

k. Related instructions. Direction to maintain the Type A IRAC with the applicable manual shall be included when applicable, as quoted below:

(1) "For IRACs affecting manuals in paper copy – maintain this IRAC with the applicable manual by placing or attaching it directly behind the title page. Mark the specific area affected and annotate the changed page or card listed on the A page with a vertical line in the margin next to the changed data, opposite the binding. For double column material, mark the center margin when the inner paragraph is affected. Note the IRAC number in the margin. This IRAC shall not be removed until receipt of formal change pages."

(2) "For IRACs affecting manuals that are on digital media – affix an adhesive label to the digital media case annotated with the applicable publication number and IRAC number. The label should be positioned to allow for additional IRACs as they occur and should not cover the date or digital media title. Maintain the IRAC on file until receipt of the superseding digital media."

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

(3) The preparing activity, point of contact, code, and target date for incorporating the IRAC into the affected manual (no later than 12 months from the date of IRAC issue) shall be indicated.

3.6.1.2 Deleted

3.6.1.3 Type B IRAC format and arrangement. Type B IRACs shall be formatted as described below (see figure 3 as an example). Enclosures in the form of replacement pages or added pages shall be included as applicable.

a. Security markings shall be in accordance with current regulations and MIL-DTL-23618, MIL-STD-38784, MIL-DTL-81927, or the general requirement specifications used to prepare the TM.

b. Replacement pages or added pages shall be prepared in the same style and format as the existing TM. Change symbols shall be applied as specified in the applicable general requirement specification used to prepare the TM.

c. The letters "IRAC" shall appear before the IRAC number, followed by the IRAC date and shall be listed under the manual number opposite the applicable page numbers in the same manner as normal change numbers. Each replacement or added page or card shall reflect only its latest change or IRAC number (see figure 4).

d. Replacement and backup pages shall be assigned the same page number(s) as the page(s) they are replacing in the TM. To maintain compatibility with existing page number sequencing, suffix letters shall be used for added pages.

e. The cover sheet (see figure 3) shall be constructed to provide a title block measuring approximately 6¼ X 1¼ inches across the top of the page. The title block shall be encapsulated and contain "INTERIM RAPID ACTION CHANGE" in bold type capital letters. The cover sheet shall contain:

(1) Date

(2) Category: (Priority or Urgent)

(3) From: (Issuing Activity)

(4) To: (Addressees as developed from the applicable Automatic Distribution Requirements List (ADRL). Example: F/A-18A ADRL for A1-F18AC-XXX-XXX.)

(5) Subject: The subject of the Type B IRAC cover letter shall be, "INTERIM RAPID ACTION CHANGE NO. (IRAC number) TO TECHNICAL MANUAL (NAVAIR number and title) OF (date of issue, change number, and date as applicable)."

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

(6) References: (as required)

(7) Enclosure(s): Identify all replacement /added pages as enclosures. Logically group enclosures for clarity. Work package manual example: Enclosure (1) WP 018 00, pages 2 and 89 through 94, Enclosure (2) WP 021, pages 5 and 6. Maintenance Requirement Card deck example: Enclosure (1) Cards 11 through 24, Enclosure (2) Cards 61 and 62.

(8) Point of Contact (POC): The name, title, phone number, email address, activity name, and office code of the person(s) responsible for the IRAC shall be provided. If more than one POC is identified, complete information shall be provided for each.

(9) Condition and Purpose of Change. For guidance pertaining to cancellation IRACs refer to 3.5.3. The IRAC shall state the specific condition and the purpose of the change, as follows:

"TO CORRECT/PREVENT (cite condition based on 3.1 and provide a brief explanation)." Example, To correct/prevent a Hazard to Safety of Personnel condition by providing new procedures which eliminates the potential hazard.

(10) Detailed information. For guidance pertaining to cancellation IRACs refer to 3.5.3:

(a) The following statement shall be included verbatim as the lead-in sentences introducing the technical content changes:

"Pen and ink changes to the technical content of a manual are not authorized. The following technical content change information applies to the referenced pages, paragraphs, and figures of the subject manual until the formal update is released."

(b) Instructions for incorporating the enclosures shall be provided. If applicable, the text of technical content changes shall be clear, accurate, concise, and shall be worded in the same style and format as the data to be inserted into the publications. Good judgment shall be used to maintain continuity of the actions to be taken and adequately cover the intended change.

(11) Validation. Type B IRACs shall be validated in accordance with MIL-M-85337 for accuracy prior to release. Activity name, activity code, POC name, and POC telephone number shall be provided as applicable.

(12) Related Instructions: Directions to maintain the IRAC with the applicable manual shall be verbatim as follows:

"For IRACs affecting manuals in paper copy – Maintain this IRAC with the applicable manual by placing or attaching the cover letter directly behind the title page. Mark the specific change area in the margin of each page affected and annotate the changed page or card listed on

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

the A Page with a vertical line and the IRAC number. Replacement page(s) shall be inserted as directed in 3.3.2.b. This Type B IRAC shall not be removed until receipt of the formal update."

"For IRACs affecting manuals on digital media – affix an adhesive label to the digital media case annotated with the applicable publication number and IRAC number. The label shall be positioned to allow for additional IRACs as they occur and shall not cover the date or digital media title. Maintain the IRAC on file until receipt of the superseding digital media."

(13) The preparing activity, point of contact, code, and target date for incorporating the IRAC into the affected manual (no later than 12 months from the date of IRAC issuance) shall be indicated. Example, Subject IRAC shall be incorporated into applicable manual no later than 12 months after IRAC issue date (or next formal change) by (insert activity, name, and code).

3.6.2 RAC. RACs shall be prepared as reproducible copy or other media acceptable to the applicable printing activity. Replacement pages or added pages are to be prepared in the same style and format as the affected TM.

3.6.3 RAC format and arrangement. RACs shall consist of a title page, list of effective work packages/pages/cards ("A" page/card), changed text pages and illustration pages as required.

a. The title page of the RAC shall match the basic format of the existing title page. The words Rapid Action Change, the RAC number, and RAC date shall appear on the title page below the issue or revision date (see figure 5).

b. The "A" page/card shall contain a listing of changed work package/page/cards. The listing shall provide the numbers and dates of all rapid action changes and routine changes issued against the basic TM or the latest revision. "RAC" shall appear before the RAC number, and shall be listed opposite the applicable page numbers in the same manner as normal change numbers or zeros (denoting the basic manual or current revision). Each work package, page or card listed shall reflect only its latest change or RAC number (see figures 6, 7 and 8).

c. Text and illustration pages shall be in accordance with the general requirements and technical content specifications used to prepare the TM being changed. The pages shall be prepared to add, delete, and change information in a manner that will best afford expediency, clarity, and coherency. New or changed illustrations shall meet or exceed the quality of the existing illustration.

d. Replacement pages shall be assigned the same numbers as the TM pages they replace. Added pages shall be assigned numbers compatible with the existing page sequencing and shall bear letter suffixes based on the general requirement specification used to prepare the affected TM.

e. Change symbols shall be applied as specified in the applicable general requirement specification used to prepare the TM.

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

f. The security classification of the RAC shall be determined from the content of the change. Classification of the RAC cannot exceed the classification of the affected TM. Security markings shall be in accordance with current security regulations and MIL-DTL-23618, MIL-STD-38784, MIL-DTL-81927, or the general requirement specification used to prepare the TM.

3.7 Maintaining status of RACs or IRACs. The title and "A" pages of changed TMs and all subsequent revisions shall include all incorporated RACs of previous editions (see figure 6).

a. IRACs incorporated by a TM change or revision shall be included on the "A" page of the applicable TM.

b. The "A" pages of all subsequent TM changes and revisions shall reflect the cumulative status of all IRACs and RACs issued and incorporated.

c. Cancelled IRAC numbers, including those assigned but never issued, shall be reflected on the "A" page.

d. When an IRAC cancels a previous IRAC and there is no impact on the technical content of the manual , e.g., original requirements reinstated, the IRAC will be identified on the "A" page of the manual as follows:

IRAC 4…..Cancelled
IRAC 5…..See Note

A note shall be placed below the List of Current Changes as follows:

Note: IRAC 5 cancelled IRAC 4. No impact on technical content. For record purposes only.

3.8 Printing. Printing and printing schedule requirements shall be in accordance with NAVAIR 00-25-604.

3.9 Electronic Availability. Digital copies of IRACs shall be forwarded to NATEC within one (1) business day. A digital copy of the entire TM with the IRAC or RAC digitally inserted shall be provided to NATEC by the originator for posting to the NATEC web site within 3 business days. (Refer to Technical Manual Conversion/Preparation For Web Posting Procedures located in NAVAIR 00-25-604.)

4. VERIFICATION This section is not applicable to this specification.

5. PACKAGING

5.1 Packaging. For acquisition purposes, the packaging requirements shall be as specified in the contract or order (see 6.2). When packaging of materiel is to be performed by DoD or in-house contractor personnel, these personnel need to contact the responsible packaging

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

activity to ascertain packaging requirements. Packaging requirements are maintained by the Inventory Control Point's packaging activities within the Military Service or Defense Agency, or within the military service's system commands. Packaging data retrieval is available from the managing Military Department's or Defense Agency's automated packaging files, CD-ROM products, or by contacting the responsible packaging activity.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. RACs and IRACs will be used only to expedite the issuance of essential operational and maintenance change information as specified in 3.1 (and clarified in the definitions below). All Foreign Military Sales (FMS) unique technical manuals including customized and sanitized are numbered uniquely and therefore all IRACs applicable to these manuals must be issued or reissued against the unique FMS technical manual number.

6.1.1 Applicability. RACs and IRACs are applicable to technical manuals supporting all in-production and out-of-production NAVAIR weapons systems such as: maintenance instruction manuals, related component equipment manuals, maintenance requirement cards, illustrated parts breakdown, support equipment, weapons handling and loading manuals, calibration manuals, and other related procedural manuals.

6.1.2 Exceptions.

6.1.2.1 Electronic Rapid Action Changes (ERACs). ERACs support the sustainment of Interactive Electronic Technical Manuals (IETM) and accomplish the purpose and function of IRACs in a digital format. ERACs meet the electronic requirements of specific platforms and are issued in accordance with those conditions warranting an IRAC as defined in this specification. Individual program requirements dictate the presentation systems used to display ERACs and drive the specific format of those ERACs issued. Although not identified in this document, and until a formal ERAC standard is established, platforms should develop their ERAC processes in accordance with this detail specification to the fullest extent practical.

6.1.3 Exclusions.

6.1.3.1 NATOPS. Naval Air Training and Operation Procedures Standardization (NATOPS) flight manuals and tactical manuals are excluded from the RAC and IRAC program (OPNAVINST 3710.7 refers).

6.2 Acquisition requirements. Acquisition documents should specify the following:

a. Title, number, and date of the specification.

b. The specific issue of individual documents referenced (see 2.2.1). The general requirements specification used to prepare the technical manual must also be specified.

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T06:03Z
Check the source to verify that this is the current version before use.

c. Name and address of requiring DoD activity assigned TM cognizance.

d. Name and address of the cognizant TM preparing activity if different than 6.2.c.

e. Packaging requirements (see 5.1).

6.3 Technical manuals. The requirement for technical manuals should be considered when this specification is applied on a contract. If technical manuals are required, specifications and standards that have been authorized and assigned an Acquisition Management Systems Control (AMSC) number must be listed on a separate Contract Data Requirements List (DD Form 1423), which is included as an exhibit to the contract. The technical manuals must be acquired under separate contract line items in the contract.

6.4 Definitions.

6.4.1 Aircraft grounding. A change affecting equipment operation which, if not incorporated, would result in an aircraft being grounded.

6.4.2 Environmental impact restrictions. Stringent environmental constraints have required that activities change or eliminate maintenance processes and materials that are no longer environmentally acceptable due to local or regional laws. A RAC or IRAC should be prepared and issued in response to environmental impact restrictions to ensure weapon systems or equipment can be effectively maintained and mission capability is not impaired by noncompliance with environmental laws.

6.4.3 Equipment damage. Information related to significant equipment damage that, if not corrected, would cause equipment malfunction is justification for a RAC or IRAC.

6.4.4 Hazards to safety of personnel. A change pertaining to conditions which, if not corrected, would directly contribute to bodily injury that may result in loss of life, limb, or impairment of senses (sight, hearing, smell, taste, or touch). Injuries such as bruises, scratches, pinched fingers, and discomfort caused by odors emanating from nontoxic substances should not be considered hazards that warrant a RAC or IRAC.

6.4.5 Impairment of safety of flight. A change pertaining to a subsystem (hydraulic, electrical, etc.), an assembly or component part, the failure or malfunction of which would result in the loss of an aircraft. Also pertains to a change correcting intermittent faulty operation of equipment or subsystems that might eventually result in a loss of an aircraft.

6.4.6 Mission capability/fleet readiness. Component or system failure or malfunction that prevents a weapon system or equipment from performing a specifically assigned mission. Changes in maintenance procedures; i.e. repair capabilities, expanded operating limits, etc. that reduce man-hour and material expenditures and increase readiness should also be justification for issuing a RAC or IRAC. In any case, the originator must determine whether the proposed change in operation or maintenance procedures will increase mission capability (thereby

Check the source to verify that this is the current version before use.

justifying a RAC or IRAC) or will merely improve procedures without affecting mission capability (in which case a RAC or IRAC is not justified).

5. RELATED INSTRUCTIONS:

A. FOR IRACS AFFECTING MANUALS IN PAPER COPY - MAINTAIN THIS IRAC WITH THE APPLICABLE MANUAL BY PLACING OR ATTACHING IT DIRECTLY BEHIND THE TITLE PAGE. MARK THE SPECIFIC AREA AFFECTED AND ANNOTATE THE CHANGED PAGE OR CARD LISTED ON THE A PAGE WITH A VERTICAL LINE IN THE MARGIN NEXT TO THE CHANGED DATA, OPPOSITE THE BINDING. FOR DOUBLE COLUMN MATERIAL, MARK THE CENTER MARGIN WHEN THE INNER PARAGRAPH IS AFFECTED. NOTE THE IRAC NUMBER IN THE MARGIN. THIS IRAC SHALL NOT BE REMOVED UNTIL RECEIPT OF THE FORMAL CHANGE PAGES.

B. FOR IRACS AFFECTING MANUALS ON DIGITAL MEDIA - AFFIX AN ADHESIVE LABEL TO THE DIGITAL MEDIA CASE ANNOTATED WITH THE APPLICABLE PUBLICATION NUMBER AND IRAC NUMBER. THE LABEL SHOULD BE POSITIONED TO ALLOW FOR ADDITIONAL IRACS AS THEY OCCUR AND SHOULD NOT COVER THE DATE OR DIGITAL MEDIA TITLE. MAINTAIN THE IRAC ON FILE UNTIL RECEIPT OF THE SUPERSEDING DIGITAL MEDIA.

C. (Preparing activity, code and target date for formally updating the applicable manual. Example: SUBJECT IRAC SHALL BE INCORPORATED INTO APPLICABLE MANUAL NO LATER THAN 12 MONTHS FROM THE DATE OF IRAC ISSUE)

4. Related Instructions:

a. For IRACs affecting manuals in paper copy – Maintain this IRAC with the applicable manual by placing or attaching the cover letter directly behind the title page. Mark the specific change area in the margin of each page affected and annotate the changed page or card listed on the A Page with a vertical line and the IRAC number. Replacement page(s) shall be inserted as directed in paragraph 2.b. This Type B IRAC shall not be removed until receipt of the formal update.

b. For IRACs affecting manuals on digital media – affix an adhesive label to the digital media case annotated with the applicable publication number and IRAC number. The label should be positioned to allow for additional IRACs as they occur and should not cover the date or digital media title. Maintain the IRAC on file until receipt of the superseding digital media.

c. Subject IRAC shall be incorporated into applicable manual no later than 12 months after IRAC issue date (or next formal change) by (insert activity name and code).
