MIL-N-37507
17 January 1977

MILITARY SPECIFICATION

NYSTATIN, GRAMICIDIN, NEOMYCIN SULFATE, AND TRIAMCINOLONE ACETONIDE CREAM

This specification is approved for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers Nystatin, Gramicidin, Neomycin Sulfate, and Triamcinolone Acetonide Cream (See 6.2).

2. APPLICABLE DOCUMENTS

2.1 Issues of documents. The following documents, of the issue in effect on date of invitation for bids or request for porposals, form a part of this specification to the extent specified herein.

SPECIFICATIONS

FEDERAL

PPP-B-566 - Boxes, Folding, Paperboard.
PPP-B-676 - Boxes, Setup.
PPP-C-186 - Containers, Packaging and Packing for Drugs, Chemicals and Pharmaceuticals. (See 6.3)

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Hq, Defense Personnel Support Center, ATTN: Directorate of Medical Materiel, DPSC-ATT, 2800 South 20th Street, Philadelphia, PA 19101, by using the self-addressed Standardization Document Improvement Proposal (Form DD 1426) appearing at the end of this document, or by letter.

STANDARDS

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.

(Copies of specifications and standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposals shall apply.

U. S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE,
FOOD AND DRUG ADMINISTRATION (FDA)

Federal Food, Drug, and Cosmetic Act and Regulations Promulgated Thereunder.

(Application for copies should be addressed to the Food and Drug Administration, Washington, DC 20204.)

U. S. PHARMACOPEIAL CONVENTION, INC.

The United States Pharmacopeia (USP).

(Application for copies should be addressed to the Mack Publishing Company, Easton, PA 18042.)

The National Formulary (NF).

(Application for copies should be addressed to the Mack Publishing Company, Easton, PA 18042.)

3. REQUIREMENTS

3.1 Material. Shall be a smooth, aqueous topical cream containing in each gram:

Triamcinolone Acetonide	1.0 mg
Nystatin	100,000 units
Neomycin (base) as the sulfate	2.5 mg
Gramicidin	0.25 mg

in a suitable vanishing cream base with suitable preservatives.

3.1.1 Assay for Triamcinolone Acetonide. The Triamcinolone Acetonide content of the finished cream shall be not less than 90.0 percent and not more than 115.0 percent of the required amount when determined as specified in 4.7. As an alternate to the procedure specified in 4.7, the assay procedure included in the applicable Form 6 for this item which has been approved by the Food and Drug Administration (FDA) is permitted.

3.1.2 Assay for Nystatin, Neomycin Sulfate and Gramidicin. The Nystatin, Neomycin Sulfate and Gramicidin contents of the finished cream shall be not less than 90.0 percent and not more than 140.0 percent of the required amounts when determined as specified in the applicable FDA regulations concerning certification of Antibiotics and Antibiotic-containing Drugs.

3.2 Certification. The finished cream shall conform to the applicable regulations for the Certification of Antiobiotics and Antibiotic-containing Drugs, as promulgated by the FDA, U. S. Department of Health, Education and Welfare. Each lot shall be certified by the FDA.

3.3 Ingredients.

3.3.1 Triamcinolone Acetonide. The Triamcinolone Acetonide used in the manufacture of the cream shall comply with the tests, standards, and requirements of the USP, including any supplements or revisions thereto.

3.3.2 Nystatin and Neomycin Sulfate. The Nystatin and Neomycin Sulfate used in the manufacture of the cream shall comply with the tests, standards, and requirements of the USP, including and supplements or revisions thereto. and shall conform to the applicable regulations for the Certification of Antibiotics and Antibiotic-containing Drugs, as promulgated by the FDA.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:52Z
Check the source to verify that this is the current version before use.

3.3.3 Gramicidin. The Gramicidin used in the manufacture of the cream shall comply with the tests, standards, and requirements of the NF, including any supplements or revisions thereto, and shall conform to the applicable regulations for the Certification of Antibiotics and Antibiotic-containing Drugs, as promulgated by the FDA.

3.4 Other ingredients. All other ingredients used in the preparation of the cream shall be of USP, or NF quality or, if not included in either of these compendia, they shall be of the highest pharmaceutical grade throughout, and suitable for use in a topical preparation of this type.

3.5 Expiration dating period. The expiration dating period shall be 24 months.

3.5.1 Delivery. Not more than 3 months of the expiration dating period shall have elapsed at the time of delivery to the Government.

3.6 Workmanship. The material and its containers shall be free from defects which detract from their appearance or may impair their serviceability.

4. QUALITY ASSURANCE PROVISIONS

4.1 Supplier responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and, (i) as to any expiration dated item, for the expiration dating period specified by the contractor for such item, or such longer period as may be required by regulation of any federal agency; or (ii) as to non-dated items, for not less than 3 years after delivery of the item to the Government.

4.1.2 No company supplying any ingredient(s) to the contractor will be considered an acceptable facility for the performance of any inspection requirements specified herein.

Check the source to verify that this is the current version before use.

4.2 Lot. For purpose of this specification, a lot, batch, or control is that single, uniform, and homogeneous quantity of cream produced from one formulation, subjected to the same compounding and manufacturing operation, and filled into final containers.

4.3 Sampling. Sampling shall be conducted in accordance with MIL-STD-105.

TABLE I. Sampling.

For visual examination	Inspection level	AQL (percent defective)	Unit of product
Major	S-2	1.0	Filled immediate container
Minor	II	2.5	Filled immediate container

4.3.1 For end item testing. Noncompliance with any of the following is cause for rejection.

TABLE II. Criteria for end item testing.

Characteristic	Requirement paragraph	Inspection level 1/	Minimum sample
Assay:			
Triamcinole Acetonide	3.1.1	S-2	5 composite
Nystatin, Neomycin Sulfate and Gramicidin	3.1.2	S-2	5 composite

1/ Where possible, the sample shall be used for two or more tests.

4.4 Examination. The finished cream shall be examined to determine compliance with all requirements of this specification. Nonconformance will be permitted to the extent indicated in 4.3.

Source: https://assist.dla.mil -- Downloaded: 202610-21T10:52Z
Check the source to verify that this is the current version before use.

4.4.1 Classification of defects. Examination will be conducted in accordance with the following classification of defects:

TABLE III. Classification of defects.

Categories	Defects 1/
Major	
101	Cream not free from foreign matter.
102	Cream not smooth.
103	Cream not homogeneous.
Minor	
201	Exterior of immediate container is not free from contents or foreign matter.
202	Label not free from defacing marks and tears.

1/ Inspection is not restricted to the classified possible defects listed above.

4.5 Packaging inspection. The inspection of the intermediate package, packing and marking for shipment and storage shall be in accordance with quality assurance provisions of the applicable container specification and marking requirements of MIL-STD-129.

4.6 Labeling inspection. Sampling shall be in accordance with MIL-STD-105 and the unit of product shall be the unit of issue. The inspection lot shall be the number of units of issue of each batch, lot, control number etc., offered for inspection at one time. The inspection level for labeling shall be S-2 and the acceptance number shall be zero.

4.7 Assay for Triamcinolone Acetonide.

Reagent Isoniazid Solution: Dissolve 1.0 gram of isonicotinic acid hydrazide in 500 ml of methanol contained in one liter flask. Acidify with 25 ml of concentrated hydrochloric acid, dilute to volume with methanol and mix.

Procedure:

Accurately weigh by difference about 1.0 gram of cream and transfer into a glass-stoppered Erlenmeyer flask. Add exactly 25.0 ml (pipet) of chloroform, a few glass beads and shake well for several minutes until a homogeneous mixture is obtained. Filter the mixture through a No. 42 Whatman filter paper, rejecting the first 5 ml of filtrate. This is the sample solution. Accurately weigh about 0.04 gram of USP Triamcinolone Acetonide Reference Standard and transfer into a 100-ml volumetric flask. Dissolve the sample and dilute

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:52Z
Check the source to verify that this is the current version before use.

to volume with chloroform and mix. Further dilute 10.0 ml of this solution to 100 ml with chloroform and mix well. This is the standard solution. Transfer 5.0 ml of the sample filtrate, 5.0 ml of the Standard solution, and 5.0 ml of chloroform into respective 25 ml volumetric flasks. To each flask add 10.0 ml of reagent isoniazid solution and place in a water bath or oven maintained at 55°C ± 2°C. for 45 minutes. Allow the flasks to cool to room temperature, bring to volume with chloroform and mix.

Measure the absorbance of the sample and standard in a suitable spectrophotometer at 415 ± 2 nm, using 1 cm cells and adjusting the instrument to zero absorbance with the reagent blank. Calculate percent of Triamcinolone Acetonide.

5. PACKAGING

5.1 Packaging requirements. The requirements for packaging shall be in accordance with applicable requirements of PPP-C-186 (see 6.3) and as specified herein.

5.2 Packaging. Packaging shall be level A or C, as specified (see 6.2).

5.2.1 Unit of issue. One tube containing 15 gram, as specified, constitutes one unit of issue.

5.2.2 Level A.

5.2.2.1 Immediate container. The immediate container shall be a commercially available tube-type container considered acceptable by the Food and Drug Administration (FDA) for the product contained therein and shall be of such compatibility that neither the contents nor the container are altered in any way by each other.

5.2.2.2 Unit package. At the option of the contractor, a unit package may be furnished. If a unit package is furnished, each tube shall be packaged as specified in paragraph of 5.2.5 of PPP-C-186.

5.2.2.3 Intermediate package. Twelve units of issue shall be packaged as specified in 5.2.13 of PPP-C-186. As an alterate, the intermediate package shall be a box conforming to PPP-B-566 or PPP-B-676 and fabricated of 0.020 inch board.

5.2.3 Level C. Units shall be packaged in standard commercial containers of the size and kind commonly used, which will afford the degree of protection required for shipment and use of the product for its intended purpose.

Check the source to verify that this is the currentversion before use.

5.3 Packing. Packing shall be level A, B or C, as specified (see 6.1).

5.3.1 Level A. Thirty-six intermediate packages (432 units) shall be packed in an exterior container as specified in 5.4.4 of PPP-C-186.

5.3.2 Level B. Thirty-six intermediate packages (432 units) shall be packed in an exterior container as specified in 5.4.3.5.1 of PPP-C-186.

5.3.3 Level C. The subject commodity shall be packed in substantial commerical containers of the type, size, and kind commonly used for the purpose, so constructed as to insure acceptance and safe delivery by common or other carriers, at the lowest rate, to point of delivery called for in the contract or purchase order.

5.4 Marking.

5.4.1 Labeling. Labeling shall be in accordance with the requirements of the Federal Food, Drug and Cosmetic Act and shall include the information required below:

5.4.1.1 Immediate container. Each immediate container label shall bear the following information:

(a) label information in accordance with commercial practice.

(b) the expiration date.

5.4.1.2 Unit package. Each unit package label shall bear the following information:

(a) label information in accordance with commercial practice.

(b) the National Stock Number

(c) extended potency lines.

NOTES: (1) The National Stock Number shall not be preceded by any prefix.

(2) Strip labeling may be used.

(3) Label adhesion test shall not apply.

(4) If a unit package is not supplied, the National Stock Number and extended potency lines shall appear on the immediate container label.

Source: https://assist.dla.mil -- Downloaded: 20260-21T10:52Z
Check the source to verify that this is the current version before use.

5.4.2 Intermediate package. Each intermediate package shall be marked as specified in 5.5.3 of PPP-C-186. In addition, type II shelf life marking as specified in MIL-STD-129 shall be shown. Marking shall include the legend: "STORE AT CONTROLLED ROOM TEMPERATURE 15°-30°C (59°-86°F)".

5.4.3 Exterior container. Exterior containers shall be marked as specified in 5.5.4 of PPP-C-186. Type II shelf life marking as specified in MIL-STD-129 shall be shown. Marking shall include the legend: "STORE AT CONTROLLED ROOM TEMPERATURE 15°-30°C (59°-86°F)".

6. NOTES

6.1 Ordering data. Procurement documents should specify the following:

(a) Title, number and date of this specification.

(b) National Stock Number.

(c) Selection of applicable levels of packaging and packing (See 5.2 and 5.3).

6.2 This specification covers the following item(s):

National Stock Number	Item Identification
6505-00-961-5504	NYSTATIN, GRAMICIDIN, NEOMYCIN SULFATE, AND TRIAMCINOLONE ACETONIDE CREAM, Topical, 15 Grams

6.3 All references to PPP-C-186 refer to Interim Federal Specification PPP-C-00186B which is mandatory for use until superseded by a revision.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.
