MILITARY SPECIFICATION

PREDNISOLONE ACETATE OPHTHALMIC SUSPENSION

This specification is approved for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers Prednisolone Acetate Ophthalmic Suspension.

1.2 Classification. The suspension covered by this specification shall be of the following strengths (See 6.2):

Strength 1 - 1.0 %
Strength 2 - 0.125%

2. APPLICABLE DOCUMENTS

2.1 Issues of documents. The following documents, of the issue in effect on date of invitation for bids or request for proposals, form a part of this specification to the extent specified herein.

SPECIFICATIONS

FEDERAL

PPP-C-186 - Containers, Packaging and Packing for Drugs, Chemicals and Pharmaceuticals. (See 6.3)

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Hq, Defense Personnel Support Center, ATTN: Directorate of Medical Materiel, DPSC-ATT , 2800 South 20th Street, Philadelphia, PA 19101, by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document, or by letter.

STANDARDS

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.

(Copies of specifications and standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposals shall apply.

U. S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, FOOD AND DRUG ADMINISTRATION

Federal Food, Drug, and Cosmetic Act and Regulations Promulgated Thereunder.

(Application for copies should be addressed to the Food and Drug Administration, Washington, DC 20204.)

U. S. PHARMACOPEIAL CONVENTION, INC.

The United States Pharmacopeia.

(Application for copies should be addressed to the Mack Publishing Company, Easton, PA 18042.)

The National Formulary.

(Application for copies should be addressed to the Mack Publishing Company, Easton, PA 18042.)

AMERICAN CHEMICAL SOCIETY

Reagent Chemicals

(Application for copies should be addressed to the American Chemical Society, 1155 Sixteenth Street, NW, Washington, DC 20036.)

3. REQUIREMENTS

3.1 Material.

3.1.1 Strength 1. Strength 1 shall be a sterile ophthalmic suspension of Prednisolone Acetate, USP, 1.0%, with Polysorbate 80, Hydroxypropyl Methylcellulose, Disodium Edetate, Benzalkonium Chloride and other suitable buffering agents, preservatives and/or vehicles.

3.1.2 Strength 2. Strength 2 shall be a sterile ophthalmic suspension of Prednisolone Acetate, USP, 0.125% with Polysorbate 80, Hydroxypropyl Methylcellulose, Disodium Edetate, Benzalkonium Chloride and other suitable buffering agents, preservatives and/or vehicles.

3.2 Assay. The ophthalmic suspension shall assay to contain not less than 90.0 percent and not more than 115.0 percent of the required amount of Prednisolone Acetate, when determined as specified in 4.6.1.

3.3 Sterility. The ophthalmic suspension shall be sterile when tested in accordance with the USP sterility test method.

3.4 Ingredients.

3.4.1 Prednisolone Acetate. The prednisolone acetate used in the manufacture of the suspension shall comply with the tests, standards, and requirements of the USP, including any supplements or revisions thereto.

3.5 Other ingredients. All other ingredients used in the manufacture of the suspension shall be in accordance with the tests, standards, and requirements of the USP, NF, or ACS as applicable, including any supplements or revisions thereto or, if not included in any of these compendia, the ingredients shall be of the highest pharmaceutical grade.

3.6 Expiration dating period. The expiration dating period shall be not less than 36 months.

3.6.1 Delivery. Not more than 3 months of the expiration dating period shall have elapsed at the time of delivery to the Government.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:51Z
Check the source to verify that this is the current version before use.

3.7 Workmanship. The material and its containers shall be free from defects which detract from their appearance or may impair their serviceability.

4. QUALITY ASSURANCE PROVISIONS

4.1 Supplier responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and, (i) as to any expiration dated item, for the expiration dating period specified by the contractor for such item, or such longer period as may be required by regulation of any federal agency; or (ii) as to non-dated items, for not less than 3 years after delivery of the items to the Government.

4.1.2 No company supplying any ingredient(s) to the contractor will be considered an acceptable facility for the performance of any inspection requirements specified herein.

4.2 Lot. For purposes of this specification, a lot, batch, or control is that single, uniform, and homogeneous quantity of ophthalmic suspension produced from one formulation, subjected to the same compounding and manufacturing operation, and filled into final containers.

4.3 Sampling. Sampling shall be conducted in accordance with MIL-STD-105.

TABLE I. Sampling.

For visual examination	Inspection level	AQL (percent defective)	Unit of product
Major	S-2	1.0	Filled immediate container
Minor	II	2.5	Filled immediate container

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:51Z
Check the source to verify that this is the current version before use.

4.3.1 For raw material and end item testing. Noncompliance with any of the following is cause for rejection.

TABLE II. Criteria for raw material and end item testing.

Characteristic	Requirement paragraph	Inspection level 1/	Minimum sample
Assay	3.2	S-2	5
Sterility	3.3	S-2	5

1/ Where possible, the sample shall be used for two or more tests.

4.4 Examination. The finished ophthalmic suspension shall be examined to determine compliance with all requirements of this specification. Nonconformance will be permitted to the extent indicated in 4.3 and 4.3.1.

4.5 Classification of defects. Examination will be conducted in accordance with the following classification of defects:

TABLE III. Classification of defects.

Categories	Defects 1/
Major	
101	Suspension not free from foreign matter.
102	Suspension has crystal formation.
103	Suspension not homogeneous.
Minor	
201	Exterior of immediate container is not free from contents or foreign matter.
202	Label not free from defacing marks and tears.

1/ Inspection is not restricted to the classified possible defects listed above.

4.6 Tests.

4.6.1 Assay for Prednisolone Acetate in the finished suspension. Shall be assayed as directed in the assay procedure for "Sterile Prednisolone Acetate Suspension" in the USP. As an alternate a suitable, accurate, and reproducible method may be used.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:51Z
Check the source to verify that this is the current version before use.

4.6.1.1 The bidder or offeror shall submit, with its bid or proposal, the proposed alternate method of assay for the finished ophthalmic solution. The method shall be subject to approval and acceptance by the Government. If the method is approved and accepted by the Government, such method may be employed in the testing of the material.

4.7 Packaging inspection. The inspection of the intermediate package, packing and marking for shipment and storage shall be in accordance with quality assurance provisions of the applicable container specification and the marking requirements of MIL-STD-129.

4.8 Labeling inspection. Sampling shall be in accordance with MIL-STD-105 and the unit of product shall be the unit of issue. The inspection lot shall be the number of units of issue of each batch, lot, control number, etc., offered for inspection at one time. The inspection level for labeling shall be S-2 and the acceptance number shall be zero.

5. PACKAGING

5.1 Packaging requirements. The requirements for packaging shall be in accordance with all applicable requirements of PPP-C-186 (see 6.3) and as specified herein.

5.2 Packaging. Packaging shall be level A or C, as specified (See 6.1).

5.2.1 Unit of issue. One bottle, containing 5 ml of the strength specified, constitutes one unit of issue.

5.2.2 Level A.

5.2.2.1 Immediate container: Strength 1 and strength 2. The immediate container shall be a commercially available drop-dispensing immediate container considered acceptable by the Food and Drug Administration (FDA) for the product contained therein and shall be of such compatibility that neither the contents nor the container are altered in any way by each other.

5.2.2.2 Unit package. At the option of the contractor, a unit package may be furnished for strength 1 or strength 2. If a unit package is furnished, each bottle shall be packaged as specified in 5.2.5 of PPP-C-186. As an alternate, each bottle may be packaged in a clear plastic vial having a plug, friction or screw cap closure.

5.2.3 Intermediate package. Twelve units of strength 1 or strength 2 shall be packaged as specified in 5.2.7.1 of PPP-C-186.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:51Z
Check the source to verify that this is the current version before use.

5.2.4 Level C. Units shall be packaged in standard commercial containers of the size and kind commonly used for the purpose, which will afford the degree of protection required for shipment and use of the product for its intended purpose.

5.3 Packing. Packing shall be level A, B or C, as specified (See 6.1).

5.3.1 Level A. Twenty-four intermediate packages, containing one strength only of strength 1 or strength 2, shall be packed in an exterior container as specified in 5.4.4 of PPP-C-186.

5.3.2 Level B. Twenty-four intermediate packages, containing one strength only of strength 1 or strength 2, shall be packed in an exterior container as specified in 5.4.3.1.1 of PPP-C-186.

5.3.3 Level C. The subject commodity shall be packed in substantial commercial containers of the type, size and kind commonly used for the purpose so constructed as to insure acceptance and safe delivery by common or other carriers, at the lowest rate, to point of delivery called for in the contract or purchase order.

5.4 Marking.

5.4.1 Labeling. Labeling shall be in accordance with the requirements of the Federal Food, Drug and Cosmetic Act, and shall include the information required below.

5.4.1.1 Immediate container. Each immediate container label shall bear the following information:

(a) label information in accordance with commercial practice.
(b) the expiration date.

5.4.1.2 Unit package. Each unit package label shall bear the following information:

(a) label information in accordance with commercial practice.
(b) the National Stock Number,

NOTES: (1) The National Stock Number shall not be preceded by any prefix.
(2) Strip labeling may be used.
(3) Label adhesion test shall not apply.
(4) If a unit package is not supplied, the National Stock Number shall appear on the immediate container.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:51Z
Check the source to verify that this is the current version before use.

5.4.2 Intermediate package. Each intermediate package shall be marked as specified in 5.5.3 of PPP-C-186. Type I shelf life markings shall be as specified in MIL-STD-129. Marking shall include the legend: "DO NOT PERMIT TO FREEZE" and "STORE AT CONTROLLED ROOM TEMPERATURE 15° - 30°C (59° - 86°F)".

5.4.3 Exterior container. Exterior container shall be marked as specified in 5.5.4 of PPP-C-186. Type I shelf life marking shall be shown as specified in MIL-STD-129. Marking shall include the legend: "DO NOT PERMIT TO FREEZE" and "STORE AT CONTROLLED ROOM TEMPERATURE 15° - 30°C (59° - 86°F)".

6. NOTES

6.1 Ordering data. Procurement documents should specify the following:

(a) Number and date of this specification.
(b) National Stock Number.
(c) Selection of applicable levels of packaging and packing (See 5.2 and 5.3).

6.2 This specification covers the following item(s):

National Stock Number	Item Identification	Specification Designation
6505-00-133-5843	PREDNISOLONE ACETATE OPHTHALMIC SUSPENSION, 1%, 5 ml	Strength 1
6505-00-149-1318	PREDNISOLONE ACETATE OPHTHALMIC SUSPENSION, 0.125%, 5 ml	Strength 2

6.3 All references to PPP-C-186 refer to Interim Federal Specification PPP-C-00186B which is mandatory for use until superseded by a revision.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/ vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.

DOCUMENT IDENTIFIER AND TITLE

MIL-P-37495 PREDNISOLONE ACETATE OPHTHALMIC SUSPENSION
