COMMERCIAL ITEM DESCRIPTION

SHAKER, SALT OR PEPPER; DISPENSER, SUGAR

The General Services Administration has authorized the use of this commercial item description for all Federal agencies.

1. SCOPE

1.1 Scope. This commercial item description (cid) covers aluminum and glass salt and pepper shakers and glass sugar dispensers.

2. CLASSIFICATION

2.1 Classification. The shakers and dispensers shall be of the following types and classes, as specified.

Type I - Aluminum alloy
Class 1 - Salt and pepper shakers

Type II - Glass body, moisture resistant plastic top
Class 1 - Salt and pepper shakers
Class 2 - Sugar Dispensers

3. SALIENT CHARACTERISTICS

3.1 Design and construction.

3.1.1 Type I, class 1. The type I, class 1 salt and pepper shakers shall be formed from a 3000-series aluminum alloy. The body and cap shall each be formed seamless from a single piece of aluminum with a minimum thickness of 0.020 inch (0.508 mm). The shakers shall be cylindrical in design with a maximum overall diameter of 3 inches (7.62 cm) and a maximum overall height of 4 inches (10.16 cm). The shakers shall have a minimum capacity of 5 fluid ounces (148 cu. cm). The cap shall be threaded to screw onto the body of the shaker. The size and number of dispensing holes shall be in accordance with the manufacturer's standard commercial product. A handle may be provided on the shaker(s) at the manufacturer's option.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Branch (7FXEE), 819 Taylor St., Fort Worth, TX 76102

3.1.2 Type II. The type II shaker and dispenser bodies shall be made from either a lime, borosilicate, or lead-flint colorless glass. The shaker and dispenser tops shall be made from a plastic suitable for food contact. The body and top shall be threaded to mate together. The color of the top shall be either red, white, beige, or almond as specified.

3.1.2.1 Class 1, salt and pepper shakers. The capacity of the shakers shall be 2 to 3-1/2 fluid ounces (59 to 103.5 cu. cm). The top of the shakers shall be hinged and contain an elastomer seal to prevent moisture accumulation. The size and number of dispensing holes in the top shall be in accordance with the manufacturer's standard practice.

3.1.2.2 Class 2, sugar dispensers. The capacity of the sugar dispensers shall be 9 to 12-1/2 fluid ounces (266 to 370 cu. cm). The top of the dispenser shall be hinged and self-closing. The top shall be designed with a handle, hinge, and stainless steel spring so that the top may be opened with finger pressure and return to the closed position when pressure is released. The top shall have one dispensing hole measuring 3/8 to 1/2 inch (0.95 to 1.27 cm). The top shall have an elastomer seal which completely seals the dispensing hole when closed.

3.2 Finish. The type I shakers shall have a clear anodized finish. The glass bodies of the type II shakers and dispensers shall be smoothly finished. All plastic parts shall be free of mars, blemishes, and rough edges. All holes shall be completely cleaned of flash.

3.3 Workmanship. The type I items shall be free from sharp edges, slivers, burrs, deep scratches, pits and tool marks. The type II glass bodies shall be free from cracks, chips, blisters, stones, and sharp edges. All threaded pieces shall be capable of being attached and detached with normal pressure. All moving parts shall work freely and smoothly. There shall be no defects which impair the durability, appearance, or serviceability of the item.

3.4 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within the tolerances specified and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

4. REGULATORY REQUIREMENTS

4.1 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. QUALITY ASSURANCE PROVISIONS

5.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description, shall conform to the producer's own drawings, specifications, standards, and quality assurance practices and be the same product offered for sale in the commercial market for over two years, or is the same product that has been successfully been delivered to the government on a previous contract or purchase order. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

6. PACKAGING

6.1 Preservation, packing, and marking. Preservation, packing, and marking shall be as specified in the contract or purchase order.

7. NOTES

7.1 Part Numbering. The following part identification number procedure is for government purposes and does not constitute a requirement for the contractor.

Part Numbering System for Commercial Item Description A-A-2805

```
Example:   AA2805-22A   Example - Type II, Class 2, Top Color A, Red
               |   ||| ----- Top Color (A - Red, B - White, Beige, or Almond)
               |   || ---- Class (1 or 2)
               |   | ---- Type (1 - I, 2 - II)
               | --- General commercial item description number
```

7.2 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

a. Title, number and date of this commercial item description.
b. Type and class required (see 2.1).
c. Top color for type II items (see 3.1.2).
d. Preservation, packing and marking required (see 6.1).

7.3 National Stock Numbers (NSN's): The following is a list of NSN's assigned which correspond to this CID. The list may not be indicative of all possible NSN's associated with the CID.

NSN	Nomenclature	Type	Class	Top Color
7350-00-240-7068	Pepper Shaker	I	1	--
7350-00-240-7069	Salt Shaker	I	1	--
7350-00-655-5254	Pepper Shaker	II	1	Red
7350-00-655-5255	Salt Shaker	II	1	White
7350-00-687-4409	Sugar Dispenser	II	2	White
7350-00-720-7238	Sugar Dispenser	II	2	Red
