COMMERCIAL ITEM DESCRIPTION

HERBICIDE, SIMAZINE

This specification is approved by the Commissioner, Office of Federal Supply and Services, General Services Administration for the use of all Federal agencies.

SCOPE AND CLASSIFICATION

This commercial item description covers pre-emergence herbicide Simazine in four types.

Type I — A wettable powder containing no less than 80 percent simazine.

Type II — A granular formulation containing no less than 4 percent simazine.

Type III — A nonflammable liquid containing no less than 41.9 percent simazine (4 pounds per gallon).

Type IV — A water dispersible granule containing no less than 90 percent simazine.

Salient characteristics.

Active ingredient. The active ingredient of 2-chloro-4,6-bis-(ethylamino)-s-triazine shall be quantitatively determined by gas chromatography method described in Chapter 6 of AOAC. Failure to meet the minimum requirements listed in the Scope and Classification above shall result in failure of the sample.

Registration and Labeling. This herbicide shall be registered with the Environmental Protection Agency (EPA) and labeled in compliance with the most current Regulations for the Enforcement of the Federal Insecticide Fungicide and Rodenticide Act (40 CFR 162-180).

FSC - 6840

DISTIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

QUALITY ASSURANCE

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawing, specifications, standards and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

PREPARATION FOR DELIVERY

Packaging, packing, and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.

NOTES

Intended use. The Simazine herbicides are pre-emergence herbicides intended for use in the nonselective control of vegetation on non-cropland in storage yards and parking lots, on railroads beds and ballast, under pipelines, under guide rails and surrounding sign posts on highways, on public utility right-of-ways, around buildings and tank farms, along ditchbanks and fence rows, around antenna installations and runways light, on crushed rock blankets, and in similar areas where any plant growth is undesirable. The granular type is particularly useful for soil applications where a general foliage deposit is not required or may be undesirable, or in inaccessible places where water is in limited amounts.

Although simazine is a nonselective herbicide, there are certain species of plant resistant to it or are difficult to kill. Among the resistant species are buttercup (creeping), dewberry, false golden aster, nutgrass, and vasey grass.
