INCH-POUND

MIL-T-85663(AS)
AMENDMENT 1
12 October 1990

MILITARY SPECIFICATION

TRANSMITTING SET, TELEMETRIC DATA
AN/AKT-22(V)6

This amendment forms a part of MIL-T-85663(AS), dated 20 February 1986, and is approved for use within the Naval Air Systems Command, Department of the Navy, and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 45

3.5.5.2.1g - Delete and substitute:

"3.5.5.2.1g Power Boost Board A9A2. The Front Panel shall contain power boost circuitry that under conditions of bus or power source transfers described herein will not cause the unit control to reinitialize. The unit will maintain selected control panel status during brief interruptions of input electrical power where the input voltage is between zero volts and normal electric system supply characteristics for no longer than 20 milliseconds. Interruption in excess of 20 milliseconds may cause the unit to reinitialize to default parameters and require the operator to manually reinsert desired control status."
