COMMERCIAL ITEM DESCRIPTION

SWAB, TOILET BOWL, ALL SYNTHETIC

The General Services Administration has authorized the use of this commercial item description.

Salient characteristics:

A chemical resistant bowl swab consisting of:

A molded plastic handle less than 10 inches in length.

If the handle is cylindrical in design, it shall be not less than 0.625 inch in diameter.

If the handle is of a square or angular design, the minimum dimensions shall be not less than 0.70 inch in either direction.

The handle shall have a flexible plastic cup that can move up and down the handle to squeeze the yarns of the head. The hand end of the handle shall be designed with a stop to prevent the flexible plastic cup from being removed from the handle.

At the swab end, the handle shall have an adapter to hold the yarns in place.

A swab head of polyester yarns.

The yarns shall be not less than 4-inches in length.

The total weight of the yarns shall be not less than 12 grams.

The plastic cup shall be designed to keep the hands of the user from direct contact with the cleaning solvent.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Ordering data. Purchasers shall include title, number, and date of this description. Indicate preservation, packaging, packing, labeling, and marking requirements.
