COMMERCIAL ITEM DESCRIPTION

MEASURE, LIQUID

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification RR-M-1850.

This commercial item description covers liquid measures for dispensing oil and other liquids.

Salient characteristics.

(a) Type I. Flexible spout with minimum of 60 degree swivel, minimum 14 inches in length and pouring tip with a fastening device to attach spout in a vertical position when not in use.

(b) Type II. Rigid spout with minimum of 160 degree swivel, minimum 13-1/2 inches in length with pouring tip.

(c) Capacity. 1, 2, 4, or 6 quart (plus or minus 5 percent) as specified and permanently marked.

(d) Materials:
(1) Measure - 0.079 inch minimum uncoated sheet steel with oil resistant enamel or G90 minimum galvanized coating.
(2) Washers - impervious to oil.

(e) Construction.
(1) Bottom - designed to completely drain the measure.
(2) Release valve - with mechanism operable by finger pressure.
(3) Handle - of adequate strength to support the fully loaded measure without sagging.

(f) Finish. Oil resistant enamel or galvanized coating, unless otherwise specified.

(g) Performance. Shall not leak when filled to capacity with grade 10W oil, * ASTM Standard A-525.

Workmanship. Clean, rigid, free from cracks, sharp edges, rust, burrs, or other defects that affect serviceability. Finish shall be free from lumps, blisters, grit, uncoated areas, gross, flux, black or acid spots, flaking, and imbedded foreign material. Welds, soldering, brazing, none missing, unfused, broken, or burned through; free from splatter, flash, pits, and flux scale.

Regulatory Requirements. In accordance with section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing supplier's employees to undue hazards from the recovered materials.
