COMMERCIAL ITEM DESCRIPTION

EMBOSSING MACHINE, IDENTIFICATION TAPE (MANUALLY OPERATED)

"The General Services Administration has authorized the use of this commercial item description, by all federal agencies."

1. SCOPE

This commercial item description covers manually operated portable office type machines for embossing alphanumeric symbols on plastic tape in the following tape width sizes, as specified.

Size 1 - 12.7 mm
Size 2 - 19.0 mm

2. SALIENT CHARACTERISTICS

2.1 The machine shall emboss symbols of the following height, Size 1 - 4.8 mm, Size 2 - 12.6 mm. A tolerance of + 0.8 and - 0.4 mm shall be allowed. Measurements shall be as shown in Figure 1.

2.2 The tape width tolerance shall be +/- 0.8 mm.

2.3 The embossing wheel shall contain the impression medium and shall be designed to enable the wheel to be installed or removed with common tools.

2.4 The machine shall contain the means to emboss upper case Gothic alphanumeric symbols. On tape, horizontal symbols shall be as shown in Figure 1.

2.5 Letter symbols shall include "A" thru "Z". Numeric symbols shall include "0" thru "9". The letter symbol "O" may serve as zero and "I" as one or vice versa. All machines shall include a period, a slash or dash. Special punctuation marks, symbols or signs shall be included, when specified.

2.6 The operating handle shall be of a suitable material, smooth finished.

2.7 The feed mechanism shall automatically advance the tape and assure proper spacing between symbols.

{Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any other data which may improve this document should be sent to: General Services Administration, Engineering Branch (2FYEE), New York, NY 10278.}

2.8 Instructions for the use and maintenance of the machine shall be included.

2.9 A tape guide track shall be incorporated to properly guide and align the embossing tape.

2.10 A tape holding enclosure shall be incorporated to accommodate the tape.

2.11 Each machine shall be permanently and legibly marked with the name or trademark of the manufacturer.

2.12 The embossing machine shall produce well defined symbols, free from waves, irregularities or misalignments, and there shall be no closed portion of symbols. The machine shall be capable of embossing 35,000 symbols, as well as cutting and scoring the tape 3000 times. The force applied to the operating handle shall not exceed 8 newtons for embossing and 9 newtons for cutting and scoring.

2.13 Workmanship. All exposed parts shall be free from chips, rough or sharp edged and corners. The machine shall be free from defects or imperfections which may affect appearance, impair serviceability or constitute a hazard to the user.

3. REGULATORY REQUIREMENTS

The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.4303 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

Product Conformance. The product provided shall meet the salient characteristics of this commercial item description. The quality of the product sold to the government shall be equal to or better than the quality of the product sold by the manufacturer in the commercial market. The government reserves the right to require proof of such conformance.

5. PACKAGING

Preservation, Packaging, Packing, Labeling, and Marking shall be as specified in the contract or purchase order.

6. NOTES

6.1 Addresses for obtaining copies of referenced documents:

The issue date in effect on date of invitation for bids or request for proposal shall apply.

6.1.1 Federal Acquisition Regulations (FAR) may be obtained from the U.S. Government Printing Office, Washington, D.C. 20402.
