COMMERCIAL ITEM DESCRIPTION

WEDGE; STEEL (SAW)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification GGG-W-220.

This commercial item description covers a wedge used in expanding a saw cut.

Salient characteristics:

Material - Carbon steel, heat treated Rockwell C 30 - 43.
Design - Hole or eye provided on top portion of body.
Dimensions - 9-inch nominal overall length.
Shape - In accordance with normal commercial practice.

Workmanship. All wedges shall be free from imperfections which may affect their appearance, serviceability, or durability.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Preservation, packaging, packing, and marking. The wedges shall be preserved and packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.

Note: This wedge has been assigned National Stock Number 5120-00-243-2800.
