COMMERCIAL ITEM DESCRIPTION

TOOTHBRUSH, CHILDREN'S (MULTITUFT)

The General Services Administration has authorized this use of this commercial item description, for all federal agencies

This commercial item description covers toothbrushes for use by children The classification shall be "SOFT" from incremental designations of "SOFT", "MEDIUM", and "HARD"

Type I - Straight line design

Type II - Angled design

1 Salient Characteristics.

1 1 Type I (figure 1) and Type II toothbrushes shall have a rounded leading end, shaped neck, and flat, even working surface For Type II brushes, the neck -to-handle angle (angle A) shall be 10 to 15 degrees (figure 2 and 2a) The head, neck and handle shall be molded in one piece from quality polypropylene

1 2 The Type I and Type II toothbrush shall meet the following requirements

Block length, overall,	133-165 mm (5-1/4 to 6-1/2 inches)
Head molding length	27 +/- 2 mm (1-1/16 +/- 1/16 inch)
Head molding width, max	9 +/- 0 4 mm (23/64 +/- 1/64 inch)
Thickness, max	5 mm (3/16 inch)
Number of tuft holes	24-30
Filament ends per tuft (min)	40
Filament length clear of block	9 5 +/- 0 8 mm (3/8 +/- 1/32 inch)
Filament diameter	0 005 - 0 007 inch

1 3 The toothbrush shall have a minimum of three rows of bristle tufts The tufts shall be uniformly spaced and symmetrically located The tufts shall be firmly anchored in the holes either by nickel silver slugs or by stapling

1 4 Synthetic filaments The filaments for the tuft material shall be quality nylon The ends of the filaments shall be rounded so that sharp points and rough edges, that could cause injury to the gums, are eliminated

Beneficial comments, recommendations, additions, deletions, clarification, etc , and any data which may improve this document, should be sent to GSA, Paints and Chemicals Commodity Center, 400 15th Street, S W , Auburn, WA 98001
