COMMERCIAL ITEM DESCRIPTION

DISHWASHING COMPOUND, MACHINE (NONCHLORINATED, GRANULAR)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification P-D-1800.

This commercial item description covers two classes of granular, nonchlorinated machine dishwashing compounds, suitable for use in spray-type commercial dishwashing machines equipped with or without detergent dispensing equipment. The compounds are designed to provide clean ware and glasses under heavy soil loads in soft to hard water when used at recommended ware washing concentrations.

Salient characteristics:

The dishwashing compounds shall consist of surfactants, water softening agents, alkaline builders and inhibitors. Class 1 product shall be phosphated. Class 2 product shall contain no phosphates and shall be designed for use in environmental areas where phosphates are banned.

	Percent by weight				Test method references
	Class 1		Class 2		
	Minimum	Maximum	Minimum	Maximum	
Moisture content	---	5.0	----	5.0	ASTM D 460
Condensed phosphates (as P_2O_5)	12.0	20.0	----	None	ASTM D 800
Total silicates (as SiO_2)	4.0	17.0	----	----	ASTM D 800
Available chlorine	----	None	----	None	ASTM D 2022
Total alkalinity (as Na_2O)	35.0	45.0	----	45.0	ASTM D 800
pH (1 percent aqueous solution)	11.5	13.0	11.5	13.0	ASTM E 70
Particle size					ASTM D 502
Retained on No. 16 sieve	----	10.0	----	10.0	
Retained on No. 170 sieve	90.0	----	90.0	----	

The issue of the ASTM in effect on the date of the solicitation shall be used to determine compliance with these requirements.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Commercial packaging and packing. The dishwashing compound shall be packaged and packed in accordance with normal commercial practice that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification.

ASTM standards may be obtained from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.

Note: Contractors may offer service for their products and supply, install, and maintain accessory dispensing systems in agreement with the user activities.

Acceptable brand name products but not limited to:

Class 1 - Diversey's Elect, Calgon's Calgonite, Dubois' Release, Economics' Event.
Class 2 - Calgon's Hi-Time, Dubois' HMD-34-LTN, Wyandotte's Observe.
