QQ-S-633a
AMENDMENT—2
November 21, 1963

SUPERSEDING
Int. Amendment—1 (Navy-Ships)
December 16, 1959

FEDERAL SPECIFICATION

STEEL BARS, CARBON, COLD FINISHED AND HOT ROLLED, (GENERAL PURPOSE)

This amendment, which forms a part of Federal Specification QQ-S-633a, dated November 6, 1957, was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

Page 1, paragraph 1.1, add the following at the end of paragraph:

"These bars are procured to compositions defined by the AISI Steel numbers with provisions for the specification of additional requirements in the procurement document (see 6.6)."

Page 7, add new paragraph as follows:

4.6 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in this specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

Page 7, paragraph 6.2.3, add new paragraph as follows:

6.2.3 *Cold finished bars.* In the procurement of cold finished bars under 0.55 percent carbon the CF condition will meet most requirements and is generally best suited for further machining without assessment of extras for thermal treatment as represented by the ACF and NCF conditions. It is suggested that if thermal treatment to relieve stresses before subsequent use or working is required that the cold finished stress relieved (CFSR) be procured.

Page 8, add new paragraph as follows:

6.6 Relation to commercial material. Unless otherwise specified, the bars covered by this specification are special bar quality AISI Steels as furnished commercially. A check analysis of the composition is required and additional requirements may be specified.
