SUPERSEDING
Amendment 1
July 2, 1974

FEDERAL SPECIFICATION

GRINDING MACHINE, AND GRINDING AND BUFFING MACHINE UTILITY, BENCH AND PEDESTAL, ELECTRIC

This amendment, which forms a part of Federal Specification W-G-656D, dated 15 October 1973, was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

PAGE 11

Table I, Sizes and Capacities, Type IV and Type V, Spindle shaft diameter, inches: Size 8, delete 1 and insert 5/8; Size 10, delete 1-1/4 and insert 3/4.

PAGE 12

3.11.4 Starting mechanism. Delete first ten lines and insert "Each machine shall have a switch of the proper capacity to control the motor used. The switch case shall be of suitable insulating material, or of metal suitably insulated from current carrying parts and effectively grounded. Each motor of over one horsepower, and each motor rated at more than 230 volts, shall be controlled by a pushbutton and magnetic starter having overload and low voltage protection; each motor of one horsepower or less, and rated at 230 volts or less shall have a built-in switch and overload protection. The switch shall be located".
