INCH-POUND

MIL-DTL-32393A
29 October 2019
SUPERSEDING
MIL-DTL-32393
9 August 2011

DETAIL SPECIFICATION

COVER ASSEMBLY, TERMINAL BLOCK, TWO STUD

Inactive for new design after 9 August 2011.

This specification is approved for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers the requirements for one type of terminal block cover assembly.

1.2 Part or identifying number (PIN). The PIN to be used for the terminal block cover assembly acquired by this specification is MS25046-1. The MS part number is being retained.

2. APPLICABLE DOCUMENTS

2.1 General. The documents listed in this section are specified in sections 3 and 4 of this specification. This section does not include documents cited in other sections of this specification or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet all specified requirements of the documents cited in sections 3 and 4 of this specification, whether or not they are listed.

Comments, suggestions, or questions on this document should be addressed to Defense Logistics Agency Aviation VEB, 8000 Jefferson Davis Highway, Richmond, VA 23297-5616, or e-mailed to STDZNMGT@dla.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST database at https://assist.dla.mil/.

2.2 Government document.

2.2.1 Standards. The following standards forms a part of this document to the extent specified herein. Unless otherwise specified, the issue of this document is that cited in the solicitation or contract.

FEDERAL STANDARD

FED-STD-H28 - Screw-Thread Standards for Federal Services

DEPARTMENT OF DEFENSE STANDARDS

MIL-STD-1916 - DOD Preferred Methods for Acceptance of Product

(Copies of this document are available online at https://quicksearch.dla.mil/.)

2.3 Non-government publications. The following documents form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

AEROSPACE INDUSTRIES ASSOCIATION

NASM25087 - Screw, Externally Relieved Body
NASM35338 - Washer, Lock-Spring, Helical, Regular (Medium) Series

(Copies of these documents are available online at http://www.aia-aerospace.org/.)

AMERICAN SOCIETY FOR QUALITY (ASQ)

ASQ H1331 - Zero Acceptance Number Sampling Plans

(Copies of this document are available online at http://www.asq.org.)

ASTM INTERNATIONAL

ASTM D5948 - Standard Specification for Molding Compounds, Thermosetting

(Copies of this document are available online at http://www.astm.org.)

2.4 Order of precedence. Unless otherwise noted herein or in the contract, in the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. REQUIREMENTS

3.1 Construction. The design and dimensions of the terminal block cover assembly shall be in accordance with figure 1.

3.2 Material. The terminal block cover assembly shall consist of molded thermosetting plastic in accordance with ASTM D5948, type MAI-60 or type MMI-30.

3.3 Recycled, recovered, environmentally preferable, or biobased materials. Recycled, recovered, environmentally preferable, or biobased materials should be used to the maximum extent possible provided that the material meets or exceeds the operational and maintenance requirements, and promotes economically advantageous life cycle costs.

4. VERIFICATION

4.1 Classification of inspections. The inspection requirement specified herein is classified as conformance inspection (see 4.3).

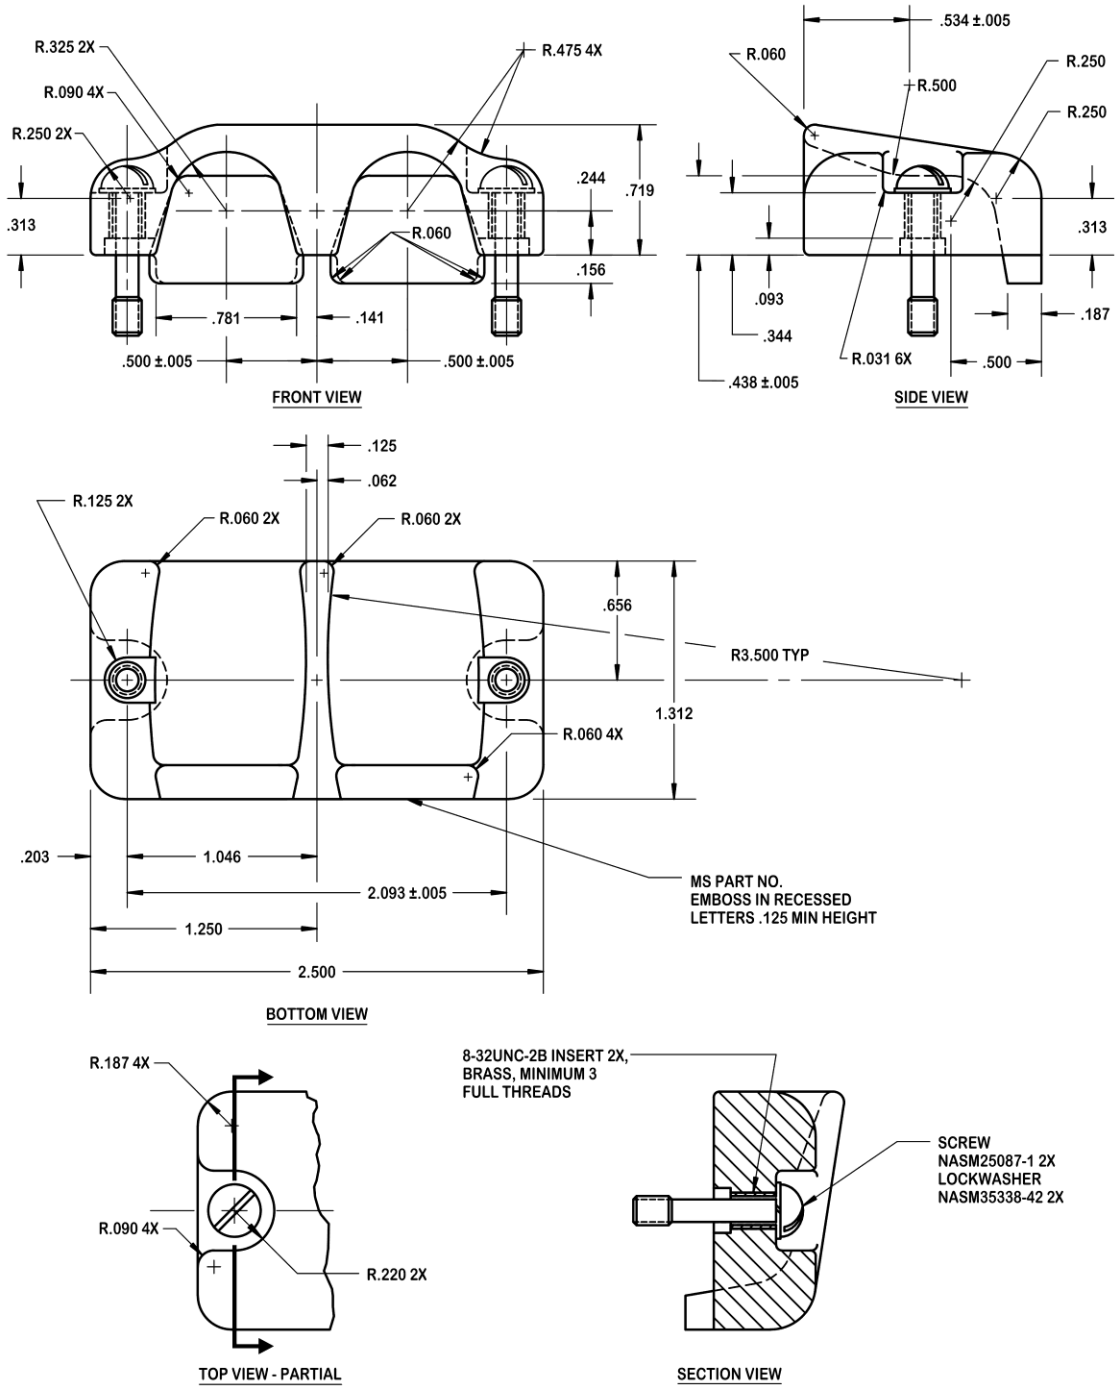

4.2 Sampling.

4.2.1 Lot. For purposes of sampling, a lot shall consist of all terminal block cover assemblies that were produced from the same lot of thermosetting plastic compound, at the same facility, using the same equipment, practices and procedures.

4.2.2 Sampling for conformance inspection. A random sample of terminal block cover assemblies shall be selected from each lot and subjected to the inspection specified in 4.3. Sampling shall be in accordance with MIL-STD-1916 or ASQ H1331. The acceptance quality limit (AQL) or verification level (VL) shall be as specified in the procurement contract (see 6.2).

4.3 Conformance inspection. Unless otherwise specified, each of the terminal block cover assemblies selected in accordance with 4.2.2 shall be examined to verify that the design and dimensional measurements are as specified in 3.1. Any dimensions not meeting the requirements specified in 3.1 shall constitute a failure.

Check the source to verify that this is the current version before use.

NOTES:
1. Dimensions are in inches.
2. Unless otherwise shown, all tolerances are ±0.015.
3. Remove all burrs and break all edges to a 0.03 radius, unless otherwise specified. All cavity walls shall be tapered.
4. Surface roughness: as molded.
5. All threads shall be in accordance with FED-STD-H28.

5. PACKAGING

5.1 Packaging. For acquisition purposes, the packaging requirements shall be as specified in the contract or order (see 6.2). When packaging of materiel is to be performed by DoD or in-house contractor personnel, these personnel need to contact the responsible packaging activity to ascertain packaging requirements. Packaging requirements are maintained by the Inventory Control Point's packaging activities within the Military Service or Defense Agency, or within the military service's system commands. Packaging data retrieval is available from the managing Military Department's or Defense Agency's automated packaging files, CD-ROM products, or by contacting the responsible packaging activity.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. The terminal block cover assembly covered by this specification is a component used in terminal board and block specifications.

6.2 Acquisition requirements. Acquisition documents should specify the following:

a. Title, number, and date of this specification.
b. AQL/VL (see 4.2.2).
c. Packaging requirements (see 5.1).

6.3 AQL/VL. Unless otherwise specified in the contract (see 6.2), statistical sampling and inspection should be in accordance with MIL-STD-1916, verification level II or ASQ H1331, AQL 4.0.

6.4 Subject term (key word) listing.

Molded
Thermosetting plastic

6.5 Changes from previous issue. The margins of this specification are marked with vertical lines to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the previous issue.
