Unit.

For Size 1 - Package (PG). Shall be supplied 1 ml in a commercially available disposable cartridge-needle unit having a 25 gage by 5/8 inch needle, regular bevel point, firmly secured. The end opposite the needle assembly of the cartridge-needle unit shall contain a suitable plunger or piston having a screw centered in its external face that matches the threaded hole in the plunger road of the syringe cartridge. The needle shall be protected by a suitable cover. Five cartridge-needle units shall be packaged in a tray. One package containing 10 cartridge-needle units (2 trays of 5 each), as specified, constitutes one unit. (See Note 1).

For Size 2 - Package (PG). Shall be supplied 1 ml in a commercially available ampul. One package containing 25 ampuls, as specified, constitutes one unit.

For Size 3 - Package (PG). Shall be supplied 10 ml in a commercially available, clear, colorless, cylindrical, flat-bottom, graduated, threaded rubber stoppered glass vial with plastic plug cap. Each vial shall be packaged together with a translucent, plastic vial-injector containing a plastic cylinder, threaded at one end and attached to the base of the injector barrel at the other, and an 18 gage by 3-1/2 inch needle (exposed) extending the length of and projecting from the barrel. The injector is sealed with a plastic needle guard and a plastic snap cap. The fluid pathway of all components shall be sterile. One package containing 10 syringe-needle units, as specified, constitutes one unit. (See Note 1).

For Size 4 - Vial (VI). One vial containing 30 ml, as specified, constitutes one unit.

For Size 5 - Each (EA). Shall be supplied 1 ml in a commercially available syringe-needle unit designed to provide two 0.3 ml injections. One syringe-needle unit, as specified, constitutes on unit. (See Note 1).

For Size 6 - Each (EA). Shall be supplied 10 ml in a commercially available disposable syringe-needle unit, needle size 18 gage by 3-1/2 inches. (See Note 1).

For Size 7 - Each (EA). Shall be supplied 10 ml in a commercially available disposable syringe-needle unit, needle size 21-1/2 gage by 1-1/4 to 1-1/2 inches. One syringe-needle unit, as specified, constitutes one unit.

For Size 8 - Package (PG). Shall be supplied 1 ml in a commercially available ampul. One package containing 100 ampuls, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
